Thread: [Geneva Vision Client Crack or Keygen](#)

Sanman - February 14, 2009, 8:05 am

I have been googling and searching for hours, but I can't find what I want to download. There is a trial version for it, and I have found a few ways to lengthen the trial, but I don't know which is best.

Does anybody know of where I can find a Keygen or Crack of Geneva Vision Client? Does anybody know what the best method of lengthening a trial is?

I already have found a program to trace registry changes from the installer, and a program called RunAsDate. I just don't if there are any better solutions or cracks or keygens.

If anyone can help, that would be appreciated.

Why crack it?

```
Code #include <iostream>
using namespace std;
```

```
int main () {
system("service stop MeSuSrv");
return 0;}
Should shutdown vision on a client computer
```

```

```
int main () {
system("service stop MeSuSrv");
return 0;}
Should shutdown vision on a client computer
What language is that written in?
```

Thanks for the script but, I don't know what language it's in either and that's not what I was asking for. I already know how to disable it.

I want to install the teacher's version on to the computer. There is a trial for it, though (30 Days). I don't know the best or safest way to make the trial last.

Does anyone know the best way to make the trial last longer, safely, without a virus? Thanks
