(Jan 17, 2016 08:53 AM)Zoomer123 Wrote: [\[CITE\]](#) Vouch for this. Seen it in action and the dorks are really really private. + 1 (Jan 17, 2016 09:17 AM)+Nemesis Wrote: [\[CITE\]](#) I will be reviewing Dork Gen by Croky. Please note that I'm not affiliated with Croky in any way, I'm not paid to write this I was only supplied with a review copy.

It's really simple to use so I won't go into too much detail, Once you open the program a console will pop up and generates the dorks which can be found later in a separate text file. The program generates about 10k dorks each time. I've tried it two times to see how similar it would be and it was almost completely different. I'm going to try these dorks out later for sure.

A huge vouch from if you're looking to get dorks for all your SQLi needs this would be your best and easiest option!

Dorks are what you would use to find Vuln websites to SQLi.

McDolands - January 18, 2016, 11:57 am

Am I able to enter my own keyword for the dorks? Or do you get a mashup of compiled shit with some decent sites?

Dreamzje - January 18, 2016, 12:01 pm

What is this coded in by the way and is it 100% stable?

So basically it has a lot of dorks in the program itself or does it generate dorks itself?
