HELPING FOR FREE <3

Hi, i am now offering free help for those who need it :D

Just comment that you need help and what you need help with and i will pm you my skype :)

I've been ratting for a decent amount of time and i've been setting up game servers aswell so i know a lot about portforwarding

I will help as best as i can with everything you ask. i will also give some tips about spreading but i obviously wont share my spreading methods

I can also photoshop your name on signs for ewhoring and whatnot :D

man you got no idea your post came like a blessing bro xD, i need help setting up my rat for some reason its not working. Im pretty sure im doing this right, im using ThinDNS which was recommended to me by a HF member here earlier, and I have 143vpn bought and im using Babylon rat. Everything was working fine until today, where all my slaves stopped connecting. Shoot me your skype please so we can sort this out hopefully. Thanks in advance.

LL startup is a must and just use the crypter for crypting.

Don't use port 80, it is primarely used by websites and usually gets blocked. try using a different port.

SIM-2985009 - January 28, 2016, 8:40 am

Hi there,

I really need some help to setup babylon. I have made my several test "stubs" and they don't work if I am using my public IP or DNS, they only work on localhost, my ports are open (I have checked that on canyouseeme.org) And also before I have used Darkcomet and everything worked fine...

So could you please help me set it up?

If yes! Send me a PM with your skype ?

Thanks!

Thehackerpersson - January 28, 2016, 9:30 am

Would really need some help! I have some questions. Thanks for helping!

OMasterBlaster0 - March 10, 2016, 1:32 am

Hi guys, i've been really busy and therefore haven't had the time to help either.
I have decided to close this thread right after i can edit it.

I have alot of things going on with work and all so am very sorry.

There is luckily alot of guys here on HF that can help you :D

Again sorry, and hope you get your problems fixed.
Thanks <3
