Thread: [NEED A FREE RAT MENTOR? | RAT SETUP | FREE RAT MENTORING |](#)

akamerge - January 18, 2016, 4:12 pm

I can give free rat setup mentoring.
Mostly on (nanocore ,killer rat ,dark comet)
We only need skype to chat and that's it .
PM me for skype

there's no need to pay for rat setup if we have so much nice people here
that can help you.

????ll?? - January 18, 2016, 4:13 pm

yeah sure i could help you out

add me on skype

xxgritzxx1

Armada - January 18, 2016, 4:27 pm

Shall we start fresh this time?

I have Luminosity Link, Byte Crypter, RA4WVPN and a DNS service .
What is my best configuration and what forwarding for I require for setup and configuration?

akamerge - January 18, 2016, 5:00 pm

sorry i don't have no experience with luminosity rat .
Maybe somebody else can help you with that

Armada - January 18, 2016, 5:01 pm

I have nanocore as well. ?

akamerge - January 18, 2016, 5:07 pm

that's just great right ?
i bet That is your best rat ??

Armada - January 18, 2016, 5:12 pm

Well, this is not answering, how can I configure Nanocore using Byte Crypter and RA4WVPN?

akamerge - January 18, 2016, 5:24 pm

i never say nothing about Byte Crypter and RA4WVPN?

ask hq user to help you with more advance stuff
am only here to help setting rat with dns ,and ports and other basic stuff
enough for new users to understand a bit ?

Armada - January 18, 2016, 5:29 pm

enough for new users to understand a bit ?
I still require help in configuring my nanocore up. Please advise.

akamerge - January 18, 2016, 5:43 pm

am not going to type everything here just a fast step

sign up to no-ip.com and then add a host
create your own host name
download client

open nanocore rat ,enable all plugins you need
goto network ,port manager ,add port ,and then enable port listening
go to building setting ,add your dns name ,scroll thru the settings you need and then click compile
to save file to your computer

now you have to crypt the file and send it to victim ,but this part you need to go by advance users
for that

[img]http://files.sharenator.com/fred_mercury_queen_meme_so_close_Curious_facts_about_our_Brain-s300x374-315923-580.png[img]

That almost looks copy and paste.
Might I make a recommendation?
Take a Read Thoroughly through my [RAT 101 Course](#)

That my good sir, if how you educate someone new to the Remote Admin scene.
Please, take a page or two and read up firstly before offering such services. ?

akamerge - January 18, 2016, 5:59 pm

i dont see nobody else make a thread to help people
so if i can help them with a lil bit , why not ?

and thanks for posting that link to help the people to learn ?

Armada - January 18, 2016, 6:16 pm

None whatsoever, who else could possibly help?

lol good job on this. Since you made a rat tutorial I don't think you'll need any help configuring it but it is relatively easy. if anyone is needing help setting up ra4wvpn with your rat just ask me. (or just read how to do it it ain't that hard) And I am not quite sure about the best combination of settings between crypter and rat but I use what I want to use and it is working fine for me.

Armada - January 19, 2016, 5:17 am

(Jan 18, 2016 09:15 PM)akamerge Wrote: [\[CITE\]](#) wawawawawaw thats alot of info to know Indeed... Its taken me years to gather the knowledge I know. I am capable of offering specific services due to my knowledge now.

What you just stated only demonstrates you are better classed as a student, not a mentor.

Dont offer services you cant support.

daddycool - June 23, 2018, 12:47 pm

you still being a mentor? ;)

Justanotheralias - June 25, 2018, 8:19 am

(Jun 23, 2018 12:47 PM)daddycool Wrote: [\[CITE\]](#) you still being a mentor? ;) Idiot look when he last logged in

Vanazoth - June 25, 2018, 5:34 pm

What would be taught by you. Would i be able to learn how to spread the rat?

usertwomany - June 26, 2018, 10:47 pm

Hi akamerge

Ive tried both IM paid RAT and Revenge RAT free.

I set the virus to start on startup, i build the virus, I run it on a VM on a separate internet connection, I see it pop up for the first time, I check on "CodeStuff Starter" and see my file there set to start when i reboot.

I reboot my VM, wait for ages and it just does not pop up on the RAT client. The "CodeStuff Starter" still shows my file but it just doesn't run.

Any ideas?

EDIT: oops! just looked at this guys last log in. I wont get any help from him but if anyone else reading this has some ideas let me know!
