If it isnt FUD then it is the next day back FUD.

But it is mostly FUD.

Here is a video how to use it:

I've buy DiverseBasic last week and for now what can I say about this crypter, even if it's in my worst english (plz forgive):

YOU WILL NOT REGRET YOUR PURCHASE!

After some trouble to make it work with LuminosityLink and some misunderstood between Miki and me all is now perfect and work's like a charm! Is also very pro in matter of customers services and satisfaction, gaving me one extra month for the time I've loose (very nice, thank a lot). ?

Here some settings to make it work sweet with LuminosityLink:

- Made a server with the settings on the screen

Spoiler [\(Click to View\)](#)  img11.hostingpics [DOT] net/pics/701441Stable1.png

- Then use the following on DiverseBasic

Spoiler [\(Click to View\)](#)  img11.hostingpics [DOT] net/pics/330952stable3.png

Make sure to don't tick anything else or it could broke your server! I've made lot of test with different settings and these are the best, LuminosityLink will work great if you touch some it may not feel perfectly.

Hope it will help and you could enjoy your slaves showing up!

norbs - January 22, 2016, 12:23 am

Question, what if the file is sent to someone and they run the virus scan on a site such as virustotal? Will my licenses be banned?

Second question, in the last thread you said "license gets locked it's either due to the new machine change or an ip change." Would it get locked if I switched VPNs and/or house locations?

Huge vouch for this amazing crypter!

Scanned a rat multiple times and has always been 100% fud! Thanks! Totally worth the 15\$, dont hesitate buying

When i bind it, it gets detected by avg and avast though... Which are two of the most popular virusscanners... Any way how to fix this?

They are two different crypters.

One is version 4 which has been updated over the years with advanced features.

Basic is for people who want a simple daily fud crypter with simple features

Hi man, I purchased your product and it seems pretty good but I have one point to say and one question to ask. It's still v 1.0 or is it because of the link I got? I am sorry I can't still write to people with Pm because I am kinda new to the forum. Also I see the main file must be an .exe but I need it to crypt a .scr so I still can make it, but do you think it will be possible to implement the .scr files available as the main file? so that I can avoid binding it. Also I was wondering what is an avg time of crypting a file since I am crypting a 20MB file with no particular conditions and it's been already a couple of hours. Just to have a vague idea of the time needed. Also one more thing. The diverse crypter can crypt directly scr files?

Hello HF buds,

I've buy DiverseBasic last week and for now what can I say about this crypter, even if it's in my worst english (plz forgive):

YOU WILL NOT REGRET YOUR PURCHASE!

After some trouble to make it work with LuminosityLink and some misunderstood between Miki and me all is now perfect and work's like a charm! Is also very pro in matter of customers services and satisfaction, gaving me one extra month for the time I've loose (very nice, thank a lot). ?

Here some settings to make it work sweet with LuminosityLink:

- Made a server with the settings on the screen

Spoiler ([Click to View](#)) img11.hostingpics [DOT] net/pics/701441Stable1.png

- Then use the following on DiverseBasic

Spoiler ([Click to View](#)) img11.hostingpics [DOT] net/pics/550898Stable2.png

Spoiler ([Click to View](#)) img11.hostingpics [DOT] net/pics/330952stable3.png

Make sure to don't tick anything else or it could broke your server! I've made lot of test with different settings and these are the best, LuminosityLink will work great if you touch some it may not feel perfectly.

Hope it will help and you could enjoy your slaves showing up!

Hello! It ' a pleasure to compare experiences . I used other settings , it is FUD , but tonight I feel (you think I can try in VM ? )

I set the startup on the server and not on crypter (for files to starup windows , use regedit ? )

I used Jünke ( half ) , daily ( 10sec ) . Like you for the file type ( managed .NET ) .

?

I have a question that maybe anyone could help me with. Possibly unrelated to crypter. Really not sure. When I put my IP in at the IP/DNS it works when I run it in Sandbox. When I put my DNS (blahblahblah.zapto.org) in it does not work at all. This is really frustrating. Ive followed every tutorial, and this is my only problem. Anyone have an idea? Please?

Sandbox is like a vm,

personally for my crypter I've disabled the use of sandbox testing/opening and certain vm's are people tried cracking my software.

**Dark.Shadow** - February 3, 2016, 10:53 am

I personnaly do not use the junk since I've few issue with LL witch could be broke due to .net.

Have read 30sec of delay is maybe good to avoid detection, but anyway have already made 16+ slaves in less than an hour with my SexyBook.pdf.exe ? and they are still there!

About the startup had a lot of troubles to make it work's, have to use the crypter instead of LL, and glad, the crypter seller help me a lot with Skype. Did your slaves still there after a restart with your

settings?

By the way I've bypassed successfully a lot of "most populars and powerfull (that joke) AVs" with my crypted server!

Since few days I'm here I've understand AVs can't do shit against DB with is daily REFUD.

Keep it up! ?

If you want to keep your slaves, Just recrypt your stub and keep updating your clients daily. I ended up getting 14 Cleints today And I only started 2h ago. Its slow involves mass messaging on a site(AutoScript). And most of my 400 Cleints are US and are gamers. But I update them on a daily biases to keep them on and active.

Note:

If you lose clients often and don't "Update" them your going to lose clients. Most ebooks and guides don't tell you this. Its a good thing to keep in mind.

To sum things up:

Find the right settings for your RAT or Http Botnert

Crypt with DB Daily

Update your clients "Daily"

Bought this product with a lifetime license

Firstly I thought that it wasn't FUD, was getting 3/35, however Miki promptly contacted me and gave me a list of HQ icons to crypt with and after a product update, I'm back with 0/35.  
10/10 price is so good

Approx when is the C# stub coming along? The Autolt stub doesnt crypt for some RATs, but all in all a good crypter.

You need to navigate to the email's inbox you purchased with there you will find your download link  
and your license code :)

Of course it does, sadly recently people decided to scan vt, doing an update to check where the stub gets scanned/by who, will automatically ban their license to prevent this :) . don't care any more caught and license will be terminated, too many warnings.

So stop complaining. When he has time to fix it he will. You can wait 1-2 days. I can. Only reason is I us DB to update my clients everyday to keep them online and FUD. It's simple as 3 steps: Wait, Receive update, Start Crypting.

If you keep Messaging him he wont have time to update your choise.

I bought this crypter for myself a few days ago, and made a post giving it a mild rating because it was getting detected by 4/35. I sent a PM to OP and he responded within two days with a possible solution, and besides that the crypter received nearly 3 updates in a matter of only a couple days. Now after the updates, and with the use of his suggestion, I'm able to make a 100% FUD crypted stub that has everything I want/need in it with no compromise. 4.5/5 This is the best crypter I've ever used for it's price and options.

Got through, and all is working. 100%??

**ferregamo23** - March 7, 2016, 6:56 am

Bought today the Basic one for 7\$ via paypal... I never get full FUD, just 3/35 or 4/35. I tried many different settings. If the Creator would give me support now would be great.

I also created an Thread where im asking, why i never get full FUD. Hoping for answers from Crypter Support.

Would really appreciate some support on skype or on PM, my skype is annalovey96

Thanks :)

**xH4fk** - March 7, 2016, 9:16 am

Guys you are retarded. You think one two clicks and you get wuuuuuaalllaa FUD? You need put some work to get things right. If I get something like you writing (4/35 etc.) Just try add another icon, change encoder dots, change some settings from rat server and test test test, after great work you get profit. Don't trash a topic, better write message " Hey mate I need some help, can I get contact info for you? " and This will be enaugh, he will contact and will support you. All you trashes gives big minus to seller, he losing clients, when he loses clients he loses money, after he loses money he will be angry and will stop his product anytime for these spams. Guys think with heads.

Mik is great seller and I always get good support from him. Better think twice before writing something anywhere.

**Dayna** - March 7, 2016, 9:43 am

Apart from the one error that has been fixed, i think this crypter is absolutely outstanding for the price!

PS: The link they send you in payivy doesnt work when you click on it, you must copy past the link in the browser (that worked for me)

Hello,

I'd like to ask which settings (RAT + crypter) I have to use to crypt my Imminent Monitor stub with Diverse Basic lite.

Quote:IM4 Settings:

-----  
Client Startup : Uncheck  
module Protection : Uncheck all  
Comile Settings: Use Hidden mode = check  
DONE

-----  
Diverse Basic Crypter Settings:

-----  
Main:  
Add File, Add icon(optional)  
Stub = Autoit  
Add file to startup = Check  
Install File = check n select Appdata

Extra:  
Use injection = Notepad.exe  
compression = uncheck  
Antis , Delay Execution = optional

Binder = optional

Crypt:  
File type = Managed Net method 2  
EOF = optional  
Add junkcode = optional  
DONE

I just read in another thread, that I shouldn't use the crypters persistence settings - or are the settings above working well?

Those are experimental settings, you need to tick .net method 2 for sure as for persistence can either it does not matter!

VOUCH! This is the first crypter I have EVER purchased and it made a great impression. It's either UD(Often 2/35) or FUD. Majority of the time, it will be FUD. The times it is UD, someone had probably tested it on virustotal.com.

is this crypter compactable with pony files

**IGotHacks** - March 25, 2016, 6:45 am

Again. This Crypter is not FUD. Neither was it for me at any time. The build it "Scanner" is - Proven! - absolute fake and does not scan. I SCANNED AN OLD DETECTED VIRUS in it and THE SCANNER SHOWED IT AS CLEAN. I even compared it to nodistribute.com . This Crypter is not FUD and the build in Scanner is a complete Fake.

I demand an update instantly or my money back. As this is false advertising. You sold this product as FUD with a working Scanner. But the product prove that neither is given.!

HUGE VOUCH FOR THIS AMAZING PRODUCT

**CHAOS** - March 29, 2016, 5:16 pm

Looking forward to buy this, seems legit and the price is awesome.

**CriStudios** - March 29, 2016, 11:07 pm

I purchased this and received a download link, but the program gave a sign-in prompt. I registered using the email that I used to buy the crypter and tried to login, but it said I have no license. There is a place to input a "product code" but I didn't get any when I purchased this software. This is very tricky and unclear. Could you please send me the key that I need to use the crypter?

EDIT: Nevermind, it came in the email, I just mistook it for a part of the download URL.

Yes I can confirm it. The crypter is fud against all standard AV's like AntiVir, McAfee, Norton, G-Data, Avast, Kaspersky, AVG etc.  
Sometimes a noname AV detects, but it's unimportant in my opinion.

I can vouch it for this price ?

Keep in mind never upload your stub to Virustotal and jotti, it reduces the duration of the fudness!

I was a victim of Mikki scandels he told me he would be good to me and take care of me. One night he invited me to his room and showed me his setup, and he showed me his crypter and all the neat functions it had. I wasn't and impressed and noddod like I was listening, he grew angry and slapped me in the face he said in a loud tone "Not impressed huh? I will show you!!!" He dragged me by my hair into onto his bed and he made me get on all fours. He started undressed me and taking my pants off I was like "plz Mikki no Mikki" and he said "oH year YOUR GOING TO GET IT NOW" He managed to slip his hand up my shirt and under my bra, and then managed to slip his other hand down my trousers and into my underwear. I put up a fight and, for some reason, Miss Congeniality came into my head. You know that scene where she teaches self defense at the pageant? So I did that. S.I.N.G - Solarplex, Instep, Nose and Groin. I felt his nose crack when I hit him and that was when he pushed me to the floor and I kicked him in the groin. I ran towards his computer and logged in his PP account and refunded everybody

the end

He's not coming back.  
He went on a scamming spree and left hf.  
besides, this crypter can't bypass shit on scan or runtime ??

Spoiler ([Click to View](#))dude, having that fiverr guy on the top pages doesn't help imho.

BTW good luck with sales :)

A retheme of this crypter can still be purchased from here:  
<https://hackforums.net/showthread.php?tid=5500310>

**FoKilPt** - June 10, 2017, 3:08 pm

UPDATE: The banned guy, Codefuser that gave me a retheme of this crypter seems to be closed due to "Law Enforcement"

Anyone else know of a crypter that was coded in one of the following:  
ASM/vb6/c/c++/Delphi/Autoit?

**mart1n** - December 27, 2017, 7:20 am

where can i purchase this? your website is not working.....

**Logic3222** - March 8, 2018, 2:56 pm

i can't buy it cuz the website is down ?

**hansje31** - March 24, 2018, 3:27 am

does this crypter also work with Quasar RAT or/and # RAT?
