every time i open a port and go to canyouseeme.org it says it cant see it open

Lexxi. - January 19, 2016, 7:26 pm

have you tried googling or watching a video on how to port forward your specific router? once you have port forwarded you can check here

<http://www.canyouseeme.org/>

also i suggest nothing uses the port or is connected when checking through canyouseeme as it will show it closed, if its for a server i recommend forwarding first, wait a minute then check the port then run whatever connects to the port.
