It's another long anime so is it worth watching? What would you rate it?

ankitkhosya - January 20, 2016, 1:21 am

it is worth watching if you are looking for a combination of comedy and awesomeness.

it becomes really good after 10 or so episodes.

Mr.Cat - January 20, 2016, 2:36 am

Yes.. Gintama is one of my favorite anime

RainbowHentAi - January 20, 2016, 3:32 am

Considering it takes up 5 of the top 10 spots on MAL, I think it's worth watching

Do it! Its pretty funny imho.

And damn its been so long since i visited this section..

Happheh should open up our old forum now that the group is gone(aF)

Yeah it's really good; if anything it's become one of those animes for me that i can watch a few episodes whenever, sure it has arcs and a plot and such kind of but like you can pick it up whenever, so like you can watch a few episodes whenever and leave it to watch other series and then go back. I've just watch a few episodes whenever i feel like it and its a very nice change of pace in life, just starting echousen

I managed to watch 4 episodes but I couldn't really get into it. The theme to it was just really off-putting.

Kiyoshi - January 20, 2016, 12:05 pm

When I started watching it, I got so fking bored.

I dno why it's so hyped up. If it's not one of these anime series you have to watch x-episodes before you can get into it.

Gintama is the anime you will watch when you wanna chill...+ after episode 20 its gets x5 better

skelly76 - January 20, 2016, 2:00 pm

Yeah I watched the first episode or two and didn't get into it like a month ago so I'm gonna try it

again soon.

Geass - January 21, 2016, 2:33 am

It has good rate at MAL but i recommend you to not watch it.
i saw first 3-4 episodes and really couldn't watch more.

Tsu-kun - January 21, 2016, 4:33 am

You have to watch it, seriously that anime is the best comedy anime ever made. What I noticed from watching it is that you need a liittle bit of Japanese language to get the joke while it's still flying.

Just, if you want an anime that makes you laugh, look no further. And yes, it needs a bit of patience until you get fully used to how awesome it is.

I found it amazing the plot and characters make no sense and few episodes later could be crazie and story wise is just so mad it's hard to follow

It's like a house full of crazie shit

That's what makes Gintama :) But honestly, it was easy as fuck to follow.
