Thread: [Best overclock settings for MSI NVIDIA GTX 970 - 4G](#)

xMagical - January 20, 2016, 8:49 am

Hey guys. It would be great if you could post some overclocking settings for the MSI NVIDIA GTX 970- 4GB. Regards,

Xycon - January 20, 2016, 8:53 am

There is no best. Each chip even if they came right after each other from the assembly, will yield different OC capabilities.

There is only trial and error.

There is only trial and error.

This, the best settings are the ones that give you a stable OC on your card.

If memory serves 970's are between 1400-1500mhz top end.
