Marnie. - January 21, 2016, 9:07 am

Hi.

I got a Android Box a while back, and have only just round to setting it all up. So I have the Regenades TV planner installed, but not all channels work. I currently have CCloud, Phoneix, Film on, Sports devil, and Pear channel. However I need a repo to install the following streams for these channels:

Sky sports 1-5
Bt sport 1+2+europe
Sky Movies Premier, Sky Movies Showcase, Sky Modern Greats, Sky Disney.
Sky 1
Fox
Sky Movies select
at the races
racing uk
setanta sports
nbc sports
lfc tv
MTV (normal channel not music channel)

I am looking for all of these, and will pay \$30 via Bitcoin to somoene who can assist.

Came across this, not sure if it's everything you are looking for but might help some. I'll do some more digging.
