Thread: [\[Community Alert \] Critical Boot Altering User Boots](#)

YourStub - January 22, 2016, 7:56 am

Going make this rather quick and to the point. It was brought to my attention that Critical Boot was altering their stress tests to look larger on the public graph I was offering when in reality the actual user boot was much less. If you look at the images posted below you will see there are some HUGE discrepancies in what IS being displayed as an average boot and what the real per user boot really is.

I contacted the member who runs the stresser and was given this generic response as to why tests are amped at a 6x rate to my graphs, "Certain IPs/ISPs are prioritized and get more power, your graph happens to be one of them.

Public Graph

Spoiler [\(Click to View\)](#)

Not so public graph

Spoiler [\(Click to View\)](#)

Proxseas - January 22, 2016, 7:57 am

It's a shame it has came to this.

YourStub - January 22, 2016, 8:02 am

Gotta report this thread you know. So people dont see it. Wouldnt want the truth getting out!

Bob White - January 22, 2016, 8:03 am

Sadly all stresser owners do this. Legit alert!

Proxseas - January 22, 2016, 8:10 am

(Jan 22, 2016 09:08 AM)Stratos Wrote: [\[CITE\]](#)

Spoiler [\(Click to View\)](#)

/thread

thats not why this community alert is here is it?

YourStub - January 22, 2016, 8:13 am

He likes to keep posting that but doesnt address why he is amplifying an attack on a public server everyone has to deceive people into thinking they are actually getting that much per boot.

Example of a user being lied to... LOL

Spoiler [\(Click to View\)](#)

YourStub - January 22, 2016, 9:14 am

We aren't here to debate your 8-12Gbps boot. This is here to show people you are manipulating traffic on live tests to portray that your services hit harder than they really do. Its obvious you are talking out of your ass. Why are you manipulating traffic to a public graph everyone uses to show higher results. "power depends on the boots active, the target host and stored records on how easy it was to down, power on plan, time of list updates, how the host filters NTP, ect." isnt going to cut

it...
"

YourStub - January 22, 2016, 6:51 pm

Please stop talking out of your ass.. Please... Why try to bullshit people?

i a m g o n e - January 22, 2016, 6:52 pm

The site is down currently, so i can't verify.

Balding - January 22, 2016, 6:53 pm

Unfortunately a lot of stressers do this. There's no way to really stop them.

Ninetales. - January 22, 2016, 6:55 pm

unfortunately i havent had such a sour experience with critical boot.

i c y u made this
but like
its hf

gotta expect dat
lol

Matt AH - January 22, 2016, 7:11 pm

I've known stratos for quite some time and I know the development and power that critical-boot brings is no question reliable, secure, and stable

240sx - January 22, 2016, 7:20 pm

Critical Boot is still powerful as fuck so I don't see why you're complaining about his dstat. Stratos knows his shit and wouldn't need to fake his own dstat power lol.

Jiggie - January 22, 2016, 7:20 pm

Every booter does this. I've used lots of booters, and Critical is run by people that know what they're doing. Anything is better than giving money to people that don't know what the hell they're doing.

YourStub - January 22, 2016, 7:22 pm

(Jan 22, 2016 08:11 PM)Matt AH Wrote: [\[CITE\]](#) I've known stratos for quite some time and I know the development and power that critical-boot brings is no question reliable, secure, and stable

Oh boy, another trustworthy vouch from HF. Listen, you can say whatever you would like about the guy, ldgaf. The point is, hes altering attacks for the graph to deceive members because he knows its public as fuck and will look great.

Ninetales. - January 22, 2016, 7:24 pm

Clearly he is, thanks.

YourStub - January 22, 2016, 7:57 pm

(Jan 22, 2016 08:43 PM)Stratos Wrote: [\[CITE\]](#) I've explained this to you, we are going in circles at this point I think you are just upset for whatever reason.

Of course, making a community alert must mean I have some personal vendetta against you.. This is here to notify people that you have shady practices and to not rely on your graphs as they are a misrepresentation of what they may get.

Ruby - January 22, 2016, 8:19 pm

I dunno what all the fuss is about. I've known Stratos for a long time and I guarantee you he is giving the best he can to his customers.

This thread is unnecessary, YourStub. For all we know your "private" graph is being heavily filtered.

Either way, 8-9Gbps still isn't bad per boot.

Ginsum - January 22, 2016, 8:22 pm

If I am correct Stratos sells VIP spots privately and hits hard as indicated on the graphs. If he puts that a normal user boot on the site is 8 - 12 Gbps then he is not manipulating users at all. He should just state on the thread what type of boot it was.

Doxicity - January 22, 2016, 10:48 pm

When Critical Boot has relatively newer lists, I'm always getting very strong hits out of it.

Sometimes its a little lower when theres a lot of boots happening at the same time, but always at least 8gbps.

YourStub - January 22, 2016, 11:03 pm

(Jan 22, 2016 09:08 PM)Matt AH Wrote: [\[CITE\]](#) Can we all take a look at YourStub's past stresser and reevaluate who this alert should be on.

"Ghetto Boot"

<https://hackforums.net/showthread.php?tid=3586935>

LOL, ghetto boot was actually quality and didnt have to alter my attacks to get customers. Lets keep forgetting he has modified his source to amp attacks on public graphs to appear to his userbase that its "strong af"..

(Jan 22, 2016 11:48 PM)Doxicity Wrote: [\[CITE\]](#) When Critical Boot has relatively newer lists, I'm always getting very strong hits out of it.

Sometimes its a little lower when theres a lot of boots happening at the same time, but always at least 8gbps.

Its hard to explain to dick riders and the blind. Again, this is NOT a thread to discuss whether or not he advertised 8-12Gbps or if users get that. It was created to INFORM THE COMMUNITY that he is altering stress tests to public graphs in order to show a larger hit. Good lord..

Moeseph - January 22, 2016, 11:18 pm

literally so much salt from yourstub cuz proxeeas is mad LOL

I can't think of any legitimate reason to alter a user's flood to use more resources on a specific ip... I mean unless he's trying to use his customers as a front to sales, making them his own lil salesmen advertising massive power...

Moeseph - January 22, 2016, 11:37 pm

That's exactly the point im trying to get across but for some it isnt sinking in. You can say a lot by saying nothing at all. Quoting their users dstats which show number in excess of 30-40Gbps per hit is int itself deception. Not once did they say "Hey that graph may be off because we are diverting additional resources to show a higher output"...Their rebuttal was that their source is so high tech, due to all the logs it keeps, that it is able to decipher how many times a target was attacks without a successful request timeout. Also its able to detect filtering and lord knows what else.....

Moeseph - January 22, 2016, 11:45 pm

ok here cuz ur mind is literally way too fucking slow to comprehend

some hosts require more power to down so yes we give them extra power

also

the less boots there are the more power each user has

those boots might have been launched when there was 1 or 2 boots running

resulting in more power

whereas the rest might have been when there was 15 boots running

we do ensure that our customers receive a minimum of 8-12 Gbps per attack though because that IS what we advertise

kys

YourStub - January 22, 2016, 11:47 pm
