I don't negotiate on scammers asking for upfront payments! I will only pay when the listing is live via paypal.

Looking for somebody who can create multiple listings on google places paying!

I just sent out my last two requests which will total my business managing 10 listings which allows me to get approved for MyBusiness instant verification.

Why do you need this? Are these legit businesses? I own a legit and registered web design company in my city but I can't do anything too sketchy.

I'll be applying for this in two weeks.
