Thread: [\[FREE SKINS\] CSGO FREE SKINS SIMPLE STEPS NO BS!](#)

Broomop - January 23, 2016, 7:42 am

I don't know where i can post this i cannot see a FREE EBOOK section.

Basically you need at least a case and then you sign up to csgo-gambler.com you then go to settings and get your REF URL. Then you go to the site YOURSELF then go in on the site you will then activate your refer as you.

Now get 2 refers then when you have finished go to settings and check the free skins button is there. If it is then open up fiddler http or tamper data.

Now depending on the amount of skins the bot has you can get up to 900+ free skins.

Once you press the button for free skins make sure you set it to breakpoint on fiddler. Add to the request link for the free skins PHP Code

```
<?php
```

```
?id='1 or 1 = '1
```

what this will do is allow you instead of just two skins you get ALL OF THEM!!

I managed to get a few hyperbeasts and man o wars and stuff like this. Enjoy the guide any issues please private message me. Hurry before it gets patched!! ?
