Thread: [Change User Agent On Gecko?](#)

AnonCensored - January 23, 2016, 8:16 am

So I want to change the user agent to this

Quote:Mozilla/5.0 (Windows NT 10.0; WOW64; rv:43.0) Gecko/20100101 Firefox/43.0

I've tried the following

<http://www.vbforums.com/showthread.php?628310-RESOLVED-How-to-change-user-agent>

<http://stackoverflow.com/questions/14653627/how-to-set-user-agent-in-geckofx>

Neither have worked for me I end up this error.

Code's I've tried :

Spoiler ([Click to View](#))

PHP Code

```
<?php
```

```
Dim sUserAgent As String =
```

```
"Mozilla/5.0 (Windows NT 10.0; WOW64; rv:43.0) Gecko/20100101 Firefox/43.0"
```

```
Gecko.GeckoPreferences.User("general.useragent.override") = sUserAgent
```

PHP Code

```
<?php
```

```
Imports System.Runtime.InteropServices
```

```
<DllImport("urlmon.dll", CharSet:=CharSet.Ansi)> _
```

```
Private Shared Function UrlMkSetSessionOption(ByVal dwOption As Integer, ByVal pBuffer As String, ByVal dwBufferLength As Integer, ByVal dwReserved As Integer) As Integer
```

```
End Function
```

```
Const URLMON_OPTION_USERAGENT As Integer = &H10000001
```

```
Public Function ChangeUserAgent(ByVal Agent As String)
```

```
    UrlMkSetSessionOption(URLMON_OPTION_USERAGENT, Agent, Agent.Length, 0)
```

```
#End Function
```

```
ChangeUserAgent(
```

```
"Mozilla/5.0 (iPhone; U; CPU like Mac OS X; en) AppleWebKit/420+ (KHTML, like Gecko) Version/3.0 Mobile/1A537a Safari/419.3")
```

```
WebBrowser1.Navigate("http://se-board.com/index.php?/index/", "_self", Nothing,
```

```
"User-Agent: Mozilla/5.0 (iPhone; U; CPU like Mac OS X; en) AppleWebKit/420+ (KHTML, like Gecko) Version/3.0 Mobile/1A537a Safari/419.3")
```

Does Gecko no longer support user agent change anymore ? Or I'm probably doing something wrong
