Thread: [Morchid Drama + Interesting Screenshots.](#)

Seasonal - January 23, 2016, 1:35 pm

I'm leaving feed back on my opinion of this and I'm sorry if this isn't allowed or in wrong section but I feel like Omni may want to see and some other users too. As, it does involve many other things that may soon be happening.

Griev?us made this thread: <https://hackforums.net/showthread.php?tid=5143631>
I noticed he said this.

Ironically, I called a mentor out on one post and said something like this WAS going to happen and this EXACT user messaged me.

Which can be shown here:

-I'm showing this as I believe Staff/Mentors and Omni should see this.

In this message, I provided several screenshots of someone saying that things like this WAS going to happen.

Now am I saying this user was involved in this? No. I'm saying this was in-deed PLANNED and I'm sure the recent "Currency Exchange" section being removed just made it happen even sooner.

Screenshots I showed Grevious

Slowly after I showed Grevious, I got removed off skype by this user and also he "doesn't use skype" anymore from what I have heard - ..ironic.

I personally do feel like there is much more of this incoming..

Omni made a thread saying he literally doesn't care. He just wants to prevent it from happening again.

This is like a movie now, it's like we're decrypting a huge system. What happened did happen, omni said he'll deal with it. Still enjoying my popcorn though.
