Thread: [\[Code Dump\] Mineplex Type Wars](#)

Ugleh - January 24, 2016, 4:10 am

Very simple to make so I thought I would just dump it. Win every time and don't let any enemy mobs move an inch. I sort of feel bad that the other teammates don't even have a chance of killing them.

```
Code    if (!this.isEnabled()) return;

    for(Entity e : mc.theWorld.loadedEntityList)
    {
        if(e instanceof EntityPlayer) continue;
        if(e.hasCustomName())
        {
            //The names used to be color coordinated based off team, not sure if it's coming back
            String name = e.getCustomNameTag().replace("§c", "").replace("§9", "");
            if(!lastMessage.equals(name))
            {
                if (time.hasReached(1000L / 12L)) {
                    lastMessage = name;
                    mc.thePlayer.sendChatMessage(name);
                    time.reset();
                }
            }
        }
    }
}
```

You will need to store a lastMessage variable in your class to prevent repeating messages.

You will also need the Timer class to prevent chat spam at

<https://github.com/latematt/timer/blob/master/src/main/java/pw/latematt/timer/Timer.java>

wow this is a spoonfeed

It's not even spoonfeeding, it's just code dumping.

It is spoon feeding.... It's not like you need to be a rocket scientist to code this.

Biker BoyZ - January 24, 2016, 1:59 pm

Nice dump man, This is not spood feeding. Anyone can dump this, but OP wanted to share. since

he is known to share dumps on here. If you don't like it fuck off.

atdx - January 24, 2016, 2:02 pm

It's a block of code people let's just leave it at that

Nice work OP

Code dumps aren't spoon feeding.

This dump is too easy to qualify as spoon feeding though doesn't it? Also spoon feeding is usually considered something people do when a question is asked, like you'll help someone but not spoon feed them. I'm not feeding anyone, I am simply providing the food.

Hey, I wouldn't want to be known as the dump man, I only dump stuff I have made that I haven't seen yet/b4.

+1 good read

MrBeanFTW99 - February 7, 2016, 9:45 pm

Is there any client that have this mod already?

That gave me a good laugh, but if mineplex really wanted to fix this, they could easily, I haven't played type wars but looking at the code it's literally you have to type in the name of the mobs, they would just implement invisible mobs with randomly generated strings of characters as their username (similar to how people create anti kill-aura plugins) to detect people using this, and they could even check the time between entering the names, there is fast, and impossible fast.

xCr33p3rx - February 8, 2016, 8:43 am

deleted, what i needed.....
