Thread: [cant access hf on computer](#)

EagleScream - January 24, 2016, 4:25 am

This appeared today, it has never happened to me before and I have not changed any settings: "Access denied. If youre using vpn/proxy/tor please disable it...."

Im not using anything. I can access hf normally on my phone. But since this morning I cant access hf on my computer.

can anybody help
tried different browsers too

edit: thanks to AsSaSs@iN I got in.

Are you running any plugins within your browser that may serve as a vpn? (eg Hola)

Try opening command prompt as administrator;

ipconfig /release

hit enter

ipconfig /renew

hit enter

Turn off your router and then back on. Let me know how it goes.
