UTRONEX - January 24, 2016, 4:38 am

UTRONEX's Complete Guide On How To Install Kodi Media Centre

This guide will show you how to install Kodi on any device. I've tried to keep it as simple as possible and took screenshots along the way to assist you in your installation, you shouldn't have any problems but if you do please feel free to drop me a PM. Even if you need help at a later date, I'm only a PM away :)

So what exactly is Kodi? It is an application in which you can install addons within it to stream anything from movies, tv shows, sports, channels, adult, webcams from around the world, music and much, much more.

Kodi is 100% LEGAL and can be downloaded on the Google play store. The addons are what you choose to install depending on what you'd like to watch or listen to.

So, on with the guide. I've left all the images at their original size to make it clearer, should look fine on most monitors :)

1. Head over to Kodi's website at <http://kodi.tv/download/> and download whichever version you need for your device. Nearly all devices are covered but you will need to Jailbreak your Apple device if you're wanting to install on one. Depending on what you're installing on go through the install process. I'm using Windows as an example but nearly all are a similiar installation.

 http://i1208.photobucket.com/albums/cc369/Sniper_/1_zpsgohccath.jpg 

 http://i1208.photobucket.com/albums/cc369/Sniper_/2_zpsnhnqgs1i.jpg 

 http://i1208.photobucket.com/albums/cc369/Sniper_/3_zps8wjo784q.jpg 

2. When it's finished installing open Kodi and you'll see a screen that looks like this. It's a bit bare so we're going to change that and get it full of useful addons.

 http://i1208.photobucket.com/albums/cc369/Sniper_/4_zpsmskji9x2.jpg 

3. Scroll across to "System" and click on "File Manager"

 http://i1208.photobucket.com/albums/cc369/Sniper_/5_zpslspz9bsg.jpg 

4. Click on "Add Source"

 http://i1208.photobucket.com/albums/cc369/Sniper_/6_zpsdjkd0ek1.jpg 

5. In the top box you need to put "http://fusion.tvaddons.ag" without the "" and fusion in the bottom box EXACTLY as I have wrote it.

 http://i1208.photobucket.com/albums/cc369/Sniper_/7_zpsoelogh1b.jpg 

 http://i1208.photobucket.com/albums/cc369/Sniper_/8_zpsvimuy7z3.jpg 

6. Go back to the main screen either by clicking the return button on your remote or hitting the backspace button on your keyboard. Next you want to go into "Settings" which again can be found under the "System" tab.

 http://i1208.photobucket.com/albums/cc369/Sniper_/9_zpskzblc9t.jpg 

7. Click on "Add-ons"

[\[IMG=600x400\]http://i1208.photobucket.com/albums/cc369/Sniper_/10_zps4iahfxlq.jpg](http://i1208.photobucket.com/albums/cc369/Sniper_/10_zps4iahfxlq.jpg)[/IMG]

8. Then "Install From Zip File"

[\[IMG=600x400\]http://i1208.photobucket.com/albums/cc369/Sniper_/11_zpsufsexitg.jpg](http://i1208.photobucket.com/albums/cc369/Sniper_/11_zpsufsexitg.jpg)[/IMG]

9. Click "fusion" then "start-here" and finally "plugin.video.hubwizard" this will install the files you need for the addons. But we're not finished yet.

[\[IMG=600x400\]http://i1208.photobucket.com/albums/cc369/Sniper_/12_zpscdf06wkd.jpg](http://i1208.photobucket.com/albums/cc369/Sniper_/12_zpscdf06wkd.jpg)[/IMG]

[\[IMG=600x400\]http://i1208.photobucket.com/albums/cc369/Sniper_/13_zpsttsioxo2.jpg](http://i1208.photobucket.com/albums/cc369/Sniper_/13_zpsttsioxo2.jpg)[/IMG]

[\[IMG=600x400\]http://i1208.photobucket.com/albums/cc369/Sniper_/14_zpskwmad02t.jpg](http://i1208.photobucket.com/albums/cc369/Sniper_/14_zpskwmad02t.jpg)[/IMG]

10. You'll see "Config Wizard" pop up in the corner and that means that we're ready to go onto the next step, installing your addons.

[\[IMG=600x400\]http://i1208.photobucket.com/albums/cc369/Sniper_/15_zpst9k5soo3.jpg](http://i1208.photobucket.com/albums/cc369/Sniper_/15_zpst9k5soo3.jpg)[/IMG]

11. Go back to the main screen again, same as before with your return button or backspace and scroll across to the "programs" tab. Then click on it.

[\[IMG=600x400\]http://i1208.photobucket.com/albums/cc369/Sniper_/16_zpsyxcjkhle.jpg](http://i1208.photobucket.com/albums/cc369/Sniper_/16_zpsyxcjkhle.jpg)[/IMG]

12. Click on "Config Wizard"

[\[IMG=600x400\]http://i1208.photobucket.com/albums/cc369/Sniper_/17_zpsls29cn6w.jpg](http://i1208.photobucket.com/albums/cc369/Sniper_/17_zpsls29cn6w.jpg)[/IMG]

13. Scroll across to which version you'll be installing. Whichever one you choose will depend on the device you are using. I'm installing on my laptop running Windows so I'm clicking on the "Windows" box. When you've clicked, hit the "yes" button and your installation will begin. Just sit back and wait, it shouldn't take long.

[\[IMG=600x400\]http://i1208.photobucket.com/albums/cc369/Sniper_/18_zpsbfindnyy.jpg](http://i1208.photobucket.com/albums/cc369/Sniper_/18_zpsbfindnyy.jpg)[/IMG]

[\[IMG=600x400\]http://i1208.photobucket.com/albums/cc369/Sniper_/19_zpsklq6tdni.jpg](http://i1208.photobucket.com/albums/cc369/Sniper_/19_zpsklq6tdni.jpg)[/IMG]

[\[IMG=600x400\]http://i1208.photobucket.com/albums/cc369/Sniper_/20_zpsva0hwb9o.jpg](http://i1208.photobucket.com/albums/cc369/Sniper_/20_zpsva0hwb9o.jpg)[/IMG]

14. When it's finished you'll automatically be re-directed back to the main Kodi page. It should look something like this, a lot better :)

[\[IMG=600x400\]http://i1208.photobucket.com/albums/cc369/Sniper_/21_zpsavq8cihq.jpg](http://i1208.photobucket.com/albums/cc369/Sniper_/21_zpsavq8cihq.jpg)[/IMG]

15. And that's it! You can sit back and enjoy Kodi, all set up and ready to go. I've took a few screenshots as examples of the TV shows, movies, channels and sports but there is LOADS more. I've been running Kodi for nearly a year and still find new things on there.

[\[IMG=600x400\]http://i1208.photobucket.com/albums/cc369/Sniper_/22_zpscwdoybxw.jpg](http://i1208.photobucket.com/albums/cc369/Sniper_/22_zpscwdoybxw.jpg)[/IMG]

[\[IMG=600x400\]http://i1208.photobucket.com/albums/cc369/Sniper_/23_zpsfjrpncjx.jpg](http://i1208.photobucket.com/albums/cc369/Sniper_/23_zpsfjrpncjx.jpg)[/IMG]

[\[IMG=600x400\]http://i1208.photobucket.com/albums/cc369/Sniper_/24_zpsvzzamcop.jpg](http://i1208.photobucket.com/albums/cc369/Sniper_/24_zpsvzzamcop.jpg)[/IMG]

[\[IMG=600x400\]http://i1208.photobucket.com/albums/cc369/Sniper_/25_zpslpy2lu75.jpg](http://i1208.photobucket.com/albums/cc369/Sniper_/25_zpslpy2lu75.jpg)[/IMG]

There's thousands of addons available to install. Everything from anime to adult and everything in between. If you're looking for something specific drop me a PM and I'll send you the instructions on how to install.

Hope I helped a few people here and enjoy Kodi :)

[\$(5)\$] - January 24, 2016, 4:48 am

This is awesome. You should've included all of that in a .pdf and let us download the .pdf!

UTRONEX - January 24, 2016, 4:52 am

[\[IMG=600x400\]http://i1208.photobucket.com/albums/cc369/Sniper_/maxresdefault_zpsiaixcnni.jpg](http://i1208.photobucket.com/albums/cc369/Sniper_/maxresdefault_zpsiaixcnni.jpg)[/IMG]

How To Install The Beast and Other Builds

Had a lot of people requesting a tutorial to install "The Beast" and other special Kodi builds. This guide will show you how to do just that :)

A lot of the steps are the same as the original post so I'm not going to repeat those I'll simply write "Same as original guide."

This guide will give you a choice of many different Kodi builds so please take a look through them all and find one you like. It's not quite as simply as the basic Kodi but don't let that put you off trying. Remember, if it all goes wrong you can simply uninstall Kodi and start all over again :)

So on with the guide.

1-4. Same as original guide.

5. In the top box you need to put "http://thebeastkodi.com/repo" without the "" and beast in the bottom box EXACTLY as I have wrote it.

http://i1208.photobucket.com/albums/cc369/Sniper_/111_zps75mvp4vq.jpg

6-8. Same as original guide.

9. Click "beast" then "Download_this_Beast.zip" this will install the files you need for the builds. But we're not finished yet.

http://i1208.photobucket.com/albums/cc369/Sniper_/222_zpsojwubmh8.jpg

http://i1208.photobucket.com/albums/cc369/Sniper_/333_zpsuadvoab2.jpg

10. You'll see "The Beast Wizard" pop up in the corner and that means that we're ready to go onto the next step, installing your chosen build.

http://i1208.photobucket.com/albums/cc369/Sniper_/444_zpsybujvxpl.jpg

11. Same as original guide.

12. Highlight but DO NOT click "The Beast Wizard"

http://i1208.photobucket.com/albums/cc369/Sniper_/555_zpsqdsowidh.jpg

Head over to <http://thebeastkodi.com/signup2/register.php> and create an account. After registering, log into your account.

http://i1208.photobucket.com/albums/cc369/Sniper_/6_zpspsckzl5i.jpg

Check your username and email address and click "verify here" if it is correct.

http://i1208.photobucket.com/albums/cc369/Sniper_/8_zpsyfxh6vjc.jpg

Go back into Kodi and open the Context Menu (C on your keyboard, right click with a mouse, long press on touch screen devices or Menu button on your remote) and select Add-on settings. Enter your email address and password then click OK.

http://i1208.photobucket.com/albums/cc369/Sniper_/9_zpsxxrgcgmr.jpg

13. Click "The Beast Wizard" and then click on which build you would like to install. For this guide, I was installing "The Beast".

[IMG]http://i1208.photobucket.com/albums/cc369/Sniper_/10_zpsci5gqd7w.jpg[/IMG]

15. After extraction, if you are on an Android/Amazon device unplug and plug back in and The Beast will be installed and ready to use. If on any other type of device select OK. When prompted, click OK again.

[IMG]http://i1208.photobucket.com/albums/cc369/Sniper_/11_zpslj5ke97q.jpg[/IMG]

16. Your device will now close Kodi. Upon restart The Beast will be installed and ready to use.

[IMG]http://i1208.photobucket.com/albums/cc369/Sniper_/13_zps3nltryyc.jpg[/IMG]

[IMG]http://i1208.photobucket.com/albums/cc369/Sniper_/14_zpsxvehuobv.jpg[/IMG]

Hope you enjoyed this build guide, if you're a little overwhelmed by it simply go back to my original one and install that instead. This guide is for users who want a little more from their Kodi experience :)

As before, please PM me with any questions you have and I'll do my best to answer them.

[\$(5)] - January 24, 2016, 5:15 am

(Jan 24, 2016 05:52 AM)UTRONEX Wrote: [\[CITE\]](#) Ok buddy I'll get one made sometime soon and post it up. I've put guides up before and had loads of PMs so thought it would be easier to post it straight up on here. Glad you liked it anyway :)

It would just make it easier to read and actually complete the task rather than trying to read it on HF.

UTRONEX - January 24, 2016, 6:02 am

(Feb 1, 2016 10:24 PM)incc Wrote: [\[CITE\]](#) Awesome guide man. I've needed something like this ever since PopcornTime was closed down.

Yeah, PopcornTime was good, as is showbox but you really can't beat Kodi for an all round streaming centre :)

(Feb 1, 2016 11:59 PM)?Zero Wrote: [\[CITE\]](#) Thanks for the Guide/Tutorial.
Not a problem mate, glad to of helped :)

(Feb 2, 2016 12:02 AM)Bluffer. Wrote: [\[CITE\]](#) I wanna get Kodi on my apple tv thanks for sharing i'll check this out.

Good stuff, let me know how you get on. I've never installed on Apple TV before would be good to see how it works out :)

(Feb 1, 2016 11:15 PM)Squalo Wrote: [\[CITE\]](#) Would it be possible to install this on the Amazon Fire Stick or such(or something else that is very cheap and functional) ?

I want to install this for my family but not in my computer since I use it lol.

Yeah sure. There are loads of cheap alternatives for installing Kodi on. If you're looking for something for the family TV I suggest buying an Android stick or an Android box. They can be picked up off eBay really cheap. When you get it they'll just be a basic install of Android so you will have to follow my guide to put Kodi on :)

Box-

<http://www.ebay.co.uk/itm/New-MXQ-Quad-Core-Android-4-4-TV-Box-Fully-Loaded-KODI-XBMC-Fr>

ee-Sports-Movies-/361432033518?hash=item54270728ee:g:oo0AAOSwcBhWYjXn

Stick-

<http://www.ebay.co.uk/itm/MK809IV-Plus-Mini-PC-Android-4-4-USB-Internet-TV-Box-Stick-Quad-Core-KODI-WIFI-/171901960743?hash=item280627c227:g:37AAAOSwlwhWShEC>

Whichever one you buy I suggest getting yourself a wireless keyboard remote as well. The original remotes are a pain in the ass!

Remote-

<http://www.ebay.co.uk/itm/2-4G-Wireless-Air-KeyBoard-Mouse-Qwerty-Remote-Touchpad-XBMC-Android-PC-TV-BOX-/331735045984?hash=item4d3cf31760:g:A2kAAOSw1S9WcqD0>

You can however install on the Firestick. It just takes a little longer than the other methods.

Here's the guide :)

[IMG]http://i1208.photobucket.com/albums/cc369/Sniper_/maxresdefault-1_zpszw1pbjid.jpg[/IMG]

Install Kodi on Amazon Firestick

1. Go to settings on your Firestick.

[IMG]http://i1208.photobucket.com/albums/cc369/Sniper_/0B-9ewpmLdTHqenhfSnFKT01Lbmc_zpsiih4jn4e.png[/IMG]

2. Click on system.

[IMG]http://i1208.photobucket.com/albums/cc369/Sniper_/0B-9ewpmLdTHqVdocG5RRUJDMFk_zpsji5fwrai.png[/IMG]

3. Click on developer options.

[IMG]http://i1208.photobucket.com/albums/cc369/Sniper_/0B-9ewpmLdTHqR1hTZXMydlk3c28_zps1px3f6l.png[/IMG]

4. Select "Apps from Unknown Sources" and turn on.

[IMG]http://i1208.photobucket.com/albums/cc369/Sniper_/0B-9ewpmLdTHqSVNHcWp5dVFxV28_zpsqobhdlyp.png[/IMG]

5. Click on OK. You can turn it off again when your install has finished but for now it must be turned on.

[IMG]http://i1208.photobucket.com/albums/cc369/Sniper_/0B-9ewpmLdTHqZUJsRGQ0NkNpcTQ_zpsqxhj5aq2.png[/IMG]

6. Go back to the home screen and click on search.

[IMG]http://i1208.photobucket.com/albums/cc369/Sniper_/0B-9ewpmLdTHqSTUxeGZKaXdsOWc_zpsbopjhplq.png[IMG]

7. Start typing ES File Explorer and click the app when it pops up.

[IMG]http://i1208.photobucket.com/albums/cc369/Sniper_/0B-9ewpmLdTHqQ2haOGJjcS00XzA_zpshdoluzin.png[IMG]

8. Click on free, it's all we will need for this install.

[IMG]http://i1208.photobucket.com/albums/cc369/Sniper_/0B-9ewpmLdTHqMHhpRmpHQkx6LXc_zpsqwynnpjr.png[IMG]

9. Wait for the app to install and then open it up.

[IMG]http://i1208.photobucket.com/albums/cc369/Sniper_/0B-9ewpmLdTHqcjlaenJMN0UwdFE_zpsfr4lj6gk.png[IMG]

10. Click on "favourite" when ES File Explorer opens.

[IMG]http://i1208.photobucket.com/albums/cc369/Sniper_/0B-9ewpmLdTHqaTN6MGQ4eTdFNFE_zpsbzxrcagp.png[IMG]

11. Click on "add".

[IMG]http://i1208.photobucket.com/albums/cc369/Sniper_/0B-9ewpmLdTHqTVBmdDA5U0Q4U0U_zpsaunytgbz.png[IMG]

12. Select "path".

[IMG]http://i1208.photobucket.com/albums/cc369/Sniper_/0B-9ewpmLdTHqVXI4U1ZZRDJ5QjQ_zps5gsc2ke8.png[IMG]

13. Type "http://kodi.tv/download" without the "" EXACTLY as I have written it.

[IMG]http://i1208.photobucket.com/albums/cc369/Sniper_/0B-9ewpmLdTHqN244NW5lckF1MXc_zps8tscpafr.png[IMG]

14. Type "Kodi" and click next.

[IMG]http://i1208.photobucket.com/albums/cc369/Sniper_/0B-9ewpmLdTHqMHJWZHZHJWtNpZa0E_zps2feenwg6.png[IMG]

15. When that's done, simply click "add".

[\[IMG\]http://i1208.photobucket.com/albums/cc369/Sniper_/0B-9ewpmLdTHqSEtaNDIQWEJwTUE_zpsgmozcr0k.png\[/IMG\]](http://i1208.photobucket.com/albums/cc369/Sniper_/0B-9ewpmLdTHqSEtaNDIQWEJwTUE_zpsgmozcr0k.png)

16. Scroll down your favourite list and click on Kodi.

[\[IMG\]http://i1208.photobucket.com/albums/cc369/Sniper_/0B-9ewpmLdTHqOFhvOGRGODJXd3c_zpstbjujkw.png\[/IMG\]](http://i1208.photobucket.com/albums/cc369/Sniper_/0B-9ewpmLdTHqOFhvOGRGODJXd3c_zpstbjujkw.png)

17. The Kodi page will pop up in the window, you'll notice it's the same page as we used on the original install guide.

[\[IMG\]http://i1208.photobucket.com/albums/cc369/Sniper_/0B-9ewpmLdTHqS29Md3ZrXy1oYUk_zpsptcwzh6.png\[/IMG\]](http://i1208.photobucket.com/albums/cc369/Sniper_/0B-9ewpmLdTHqS29Md3ZrXy1oYUk_zpsptcwzh6.png)

18. Select the ARM version of the Android installer.

[\[IMG\]http://i1208.photobucket.com/albums/cc369/Sniper_/0B-9ewpmLdTHqdTJPbkdkRWx2TFE_zpsb6dgsgez.png\[/IMG\]](http://i1208.photobucket.com/albums/cc369/Sniper_/0B-9ewpmLdTHqdTJPbkdkRWx2TFE_zpsb6dgsgez.png)

19. Sit back and wait for the download to complete.

[\[IMG\]http://i1208.photobucket.com/albums/cc369/Sniper_/0B-9ewpmLdTHqeTlyRGtsM1ZiOVk_zpslbvc5itr.png\[/IMG\]](http://i1208.photobucket.com/albums/cc369/Sniper_/0B-9ewpmLdTHqeTlyRGtsM1ZiOVk_zpslbvc5itr.png)

20. Click on "open file".

[\[IMG\]http://i1208.photobucket.com/albums/cc369/Sniper_/0B-9ewpmLdTHqcXNleDRGWkdCV3M_zpsb5dxuhoc.png\[/IMG\]](http://i1208.photobucket.com/albums/cc369/Sniper_/0B-9ewpmLdTHqcXNleDRGWkdCV3M_zpsb5dxuhoc.png)

21. Click on install.

[\[IMG\]http://i1208.photobucket.com/albums/cc369/Sniper_/0B-9ewpmLdTHqUzNsbzB4ZEIpY00_zpsxsthpm.png\[/IMG\]](http://i1208.photobucket.com/albums/cc369/Sniper_/0B-9ewpmLdTHqUzNsbzB4ZEIpY00_zpsxsthpm.png)

22. Again, click install.

[\[IMG\]http://i1208.photobucket.com/albums/cc369/Sniper_/0B-9ewpmLdTHqcVV6REEyUnFEaWs_zpsq5obsli6.png\[/IMG\]](http://i1208.photobucket.com/albums/cc369/Sniper_/0B-9ewpmLdTHqcVV6REEyUnFEaWs_zpsq5obsli6.png)

23. Once it's installed, click open and from there you can follow my other guide to install the addons you want.

[IMG]http://i1208.photobucket.com/albums/cc369/Sniper_/0B-9ewpmLdTHqcGpJQzR4c3hfNXM_zpsklv3t3ol.png[IMG]

Again, if you've got any questions drop me a PM. I'll do my best to help you in any way I can :)

Shot Caller - January 27, 2016, 11:04 am

I've got The Beast 1.5 on Kodi on my firestick in my room its beast :) Get HQ sports channels and everything and no extra cables I plug the USB into my TV, its god coz my TV is up on the wall and it only has 1 wire coming from it which is the power :)

UTRONEX - January 27, 2016, 12:31 pm

Awesome dude :) I'm running three boxes in my home, 1 laptop and 2 phones all loaded with Kodi. Can't beat it for streaming.

UTRONEX - January 30, 2016, 12:29 am

A new addon has been released to the Kodi community dedicated to sports.

Its called castaway and looks as though it will be giving sportsdevil a run for its money. Its in beta stage at the moment but don't let that put you off installing. As new versions are released they will automatically be downloaded to your Kodi without you having to do anything.

[IMG]http://i1208.photobucket.com/albums/cc369/Sniper_/84361548-7003-4387-83F9-FCF23A91D1B9_zpsbzipresh1.jpg[IMG]

How to install- <https://www.tvaddons.ag/castaway-sports-kodi/>

Enzio - January 30, 2016, 2:58 pm

Posting here so I can find it later. Thanks.

UTRONEX - January 30, 2016, 2:59 pm

No problem dude, if you need any extra help just drop me a PM :)

iReflex - January 31, 2016, 1:57 pm

Ive been using Kodi for a while. The best build is probably THEBEAST you should make a tutorial on installing that build. Also you should make a tutorial on the EROTIK XXX addon im sure it would appeal to a lot of people.

Cirez D - January 31, 2016, 1:58 pm

(Jan 31, 2016 02:57 PM)iReflex Wrote: [\[CITE\]](#) Ive been using Kodi for a while. The best build is probably THEBEAST you should make a tutorial on installing that build. Also you should make a tutorial on the EROTIK XXX addon im sure it would appeal to a lot of people.

Do builds have sources/add ons included too? Keep hearing about builds but never tried them.

UTRONEX - January 31, 2016, 1:59 pm

Yeah sure I'll write a guide for the popular builds when I get round to it.

This is by far the easiest for the beginner to install but the builds would appeal to the more advanced user. Probably won't be until the weekend now but sure I'll get some guides up for you all :)

Suboptimal - January 31, 2016, 2:26 pm

Interested setup, thanks for the information.

UTRONEX - January 31, 2016, 3:40 pm

(Jan 31, 2016 03:26 PM)Suboptimal Wrote: [\[CITE\]](#) Interested setup, thanks for the information.
No problem :) thought it was about time I did a proper guide. I did one a while ago but it was really rushed and didn't get much attention from the community.

Unkn0wnUs3r - January 31, 2016, 3:50 pm

Trying this now. Thank you!

Nads - January 31, 2016, 7:45 pm

Works great man, thanks for this.

Cupp - January 31, 2016, 9:05 pm

Any feedback on the castaway OP?

UTRONEX - February 1, 2016, 2:43 am

(Jan 31, 2016 08:45 PM)Nads Wrote: [\[CITE\]](#) Works great man, thanks for this.
Not a problem buddy, glad to of helped!

Keep checking back on the thread I'll be updating it with addons all the time.

Regarding castaway- haven't had a chance to check it yet (my team hasn't been playing) I'll be watching a match on Tuesday night so will update then.

Update on original post- Now included a guide on how to install custom builds of Kodi :)

incc - February 1, 2016, 9:24 pm

Awesome guide man. I've needed something like this ever since PopcornTime was closed down.

Enzio - February 1, 2016, 10:15 pm

Would it be possible to install this on the Amazon Fire Stick or such(or something else that is very cheap and functional) ?

I want to install this for my family but not in my computer since I use it lol.

?Zero - February 1, 2016, 10:59 pm

Thanks for the Guide/Tutorial.

Bluffer - February 1, 2016, 11:02 pm

I wanna get Kodi on my apple tv thanks for sharing i'll check this out.

UTRONEX - February 4, 2016, 1:02 am

Amazon FireStick Kodi install guide now on page one.

Take a look and as always, PM me if you need anymore help :)

S Malkiq Sam - February 5, 2016, 4:14 pm

Just threw a glance and I like it a lot! This is kind of a HQ thread!

OG Breezy - February 5, 2016, 4:38 pm

hq guide kodi is awesome

UTRONEX - February 6, 2016, 1:09 am

(Feb 5, 2016 05:38 PM)OG_Breezy Wrote: [\[CITE\]](#) hq guide kodi is awesome
Yeah Kodi is awesome but people find it hard to install even though it's easy. Once you know how you realise how easy it is but until then it's pretty hard to get your head around.

Ties - February 6, 2016, 1:10 am

Really HQ Thread, Thanks For Sharing

UTRONEX - February 7, 2016, 7:07 am

Jarvis Release Candidate 3 Available To Download!

Quote:It's time for the third Release Candidate for Kodi v16. With this release candidate we added a small number of fixes that users brought to our attention. Since we only have a small team and we can't test it all we must rely on users reporting potential problems on our forum and we try to fix them within our limited spare time. All in all this release is looking like it's quite solid so far.

Some of you commented on several occasion that we should first fix the "known problems" in our previous versions before jumping to the next one. The fact is that fixing those problems correctly is such an undertaking that we simply can't keep working on the previous one. Our team vision is to keep moving forward and along the way release version for users to use and enjoy that are considered stable enough. We don't force people to upgrade so if you like an older Kodi version for some reason just keep using it. This vision is known as Release Early Release Often (RERO) on which we'll make a more in depth review soon.

Fixes done in Release Candidate 3:

- Fix some possible DVD menu problems
- Fix selection of stacked multiple ISO files (movie.disc1.iso, movie.disc2.iso, movie.disc3.iso etc)
- Fix navigation in EPG grid when there's channels have no EPG data available
- Add missing MOOD tag scanning for FLAC/Ogg/Xiph/Vorbis, ASF and MP4/iTunes like other file format
- Use local icon stored icon instead of downloading a new one when for the add-on update notification
- Fix CPU feature check on Android for newer kernels
- Fix not correctly selecting items in a list when list is updated or going to next page
- Fix "renderloop" crashes on Windows
- Fix accidental repeated button presses with long-press feature
- Added French AZERTY keyboard

Fixes done in Release Candidate 2:

- Additional fixes done on saving setting when switching between different profiles
- Increase time-out when searching for audio devices on Windows which solves some cases of Kodi not starting
- Fix crash when unplugging USB devices
- Fix crash when choosing Add Timer in EPG window

Please report any problems on our forum <http://forum.kodi.tv> and not on the release announcement.

With that said lets focus on some things that have been changed and added which are noticeable for the end users.

What did change in Kodi 16:

- Implement the more future proof DirectX11 for Windows which still works for DirectX9 video cards;
- Event logging which among others shows which video files didn't get added to your library;
- Skin settings are now stored as separate files like any other add-on which makes migrating settings a lot easier;
- Image resource add-ons which provide a single point of entry for skins to share common used images like movie studio icons and record labels which saves quite a lot of space and bandwidth;
- Audio DSP (Digital Signal Processing) add-on integration and are already included which could make things possible like equalizers, sound processing, fake surround and more
- PVR/DVR section has been extended and improved massively which now also handles series recording
- Music library improvements which includes asking to scan to library when adding locations and also better tag scanning
- Button long-press which extends the functionality of a single button to handle two functions which is great for button deprived remotes
- User interface now supports a new stereoscopic depth effect for 3D TVs or VR headsets
- Extend the UPnP server/client integration between Kodi installations
- Android now support a Surface Rendering which keeps the interface at normal HD resolution while allows playback of 4K on supported devices
- Removal of the infamous libstagefright on Android which served us for the past years while the Android platform matured to a fully featured MediaCodec
- Add-on manager underwent heavy changes which includes slightly different structure, per add-on auto-update on/off switch, better update/rollback support to choose from repos,
- Extend the included keyboard layouts which includes Korean and Chinese
- Improved multi-touch support which now also works on Linux
- Gives skin developers a more reliable platform to work from and reduce amount of work for adapting to new Kodi versions
- Greatly improved audio and video playback in general

With the list above we only highlighted some of the more noticeable features. The complete list is huge which could fill several pages. A lot of changes went in Kodi 16 like removing old code, splitting up parts in more logical chunks and making it all more resilient to future changes. All these changes are part of a massive change list that only makes sense to developers actually knowing what the source code does. In short we will not bother you with summing up that list. It's just something that is worth mentioning that not all improvements have to be actual features and are visible to users. We prefer that the program actually works than adding new bells and whistles. Most of the times new features are just a side effect of cleaning up our code.

Add-ons

General: So far in version 16 there are no add-on changes that would impact any add-ons except for PVR. Since our 12.x Frodo release there have been some gradual changes but in general all add-ons, even from that time should still work, of course there are some exceptions. If the add-ons worked in Gotham, Helix and Isengard then we are happy to say that all these add-ons should still work.

Skins: Sadly due to the amount of changes we'll have to announce that skins will have certain parts non working. This beta will mark any version 15 skin as incompatible and will ask you to switch back to Confluence. This means that for you to continue using Kodi 16.0 you will have to switch back to Confluence or wait till the skin you use has been updated in our repository. Good news however is that a variety of skin have already start updating to latest changes.

Available skins: The following skins are already updated for version 16 and will auto-update when you upgrade. We're sure more will follow soon.

- Aeon Nox 5

- Amber
- AppTV
- Black Glass Nova
- Chroma
- Cirrus Extended
- Confluence
- Eunique
- KOver
- Mimic
- Nebula
- Rapier
- re-Touched
- Titan
- Transparency!

Ratt - February 7, 2016, 3:02 pm

Thanks for the tutorial, very helpful. :)

Danny Khalifa - February 7, 2016, 5:49 pm

Thanks for the recommendation, I'll check it out and get some screenshots up here later :)

ILY ? - February 11, 2016, 8:51 pm

DUDE! This is really cool I swear. I'm gonna download this thing!

UTRONEX - February 12, 2016, 2:12 am

(Feb 11, 2016 09:51 PM)kikoayb Wrote: [\[CITE\]](#) DUDE! This is really cool I swear. I'm gonna download this thing!

Cool.

If anyone gets the time could you come back to the thread to leave a little review on both the guide and Kodi. Would be helpful to myself to improve my future tutorials and other members who are looking for a run down :)

Teachme123 - February 12, 2016, 3:52 am

Nice guide bro thank you you need some green for this thanks again

Chocky - February 12, 2016, 3:57 am

Nice informative thread man. Some good info in here for newbies.

UTRONEX - February 12, 2016, 7:31 am

No problem chaps :) I made the guide as simple as possible. There's a few tutorials on the Internet on how to install but there's so much bullshit in it that people get easily confused.

Ellie Goulding - February 14, 2016, 5:14 am

Anyway to watch LIVE TV Shows? Channels like AMC? Or is it with <http://fusion.tvaddons.ag> ?

Kodi. - February 14, 2016, 5:21 am

(Feb 14, 2016 06:14 AM)Ellie Goulding Wrote: [\[CITE\]](#) Anyway to watch LIVE TV Shows? Channels like AMC? Or is it with <http://fusion.tvaddons.ag> ?

Yes, there is a lot of addons that host streams for AMC. With Kodi, you can literally get any channel.

Ellie Goulding - February 14, 2016, 7:23 am

MrVision - February 14, 2016, 8:39 am

Sweet guide! Thanks alot mate :)

Remorseless - February 14, 2016, 8:43 am

Why not just torrent tv shows and movies instead? It's a lot easier.

Kodi. - February 14, 2016, 8:51 am

(Feb 14, 2016 09:43 AM)Dongerlord Wrote: [\[CITE\]](#) Why not just torrent tv shows and movies instead? It's a lot easier.

Kodi is a lot easier. With a click off a button, you can literally anything you want. All live sports, live TV etc. It can also be installed on Android boxes, Raspberry PI Motherboards, so you can plug it directly into your TV from HDMI.

Anyway nice Tutorial OP! Maybe add some links to Android Boxes in the OP incase some people might want to purchase one, instead of having it on there laptop:)

Remorseless - February 14, 2016, 8:52 am

Obviously doesn't understand how to use Kodi or has never used it.

Kodi is better in every way, you've been using the wrong addons if you think it's shit.

wozza - February 14, 2016, 9:42 am

Nice one, Ares wizard is great but i have found a new source which has lots of great builds on as well Its called Wookie Similar to Ares wizard but it has different builds and add ons. I use both as you can just click the Fresh start button which deletes your current build on Kodi but keeps Ares wizard and Wookie, So then you can experiment which build you find the best. The source for Wookie is <http://wiz.wookiespmc.com/> and the Build i'm using within wookie is 1ChiefTV

UTRONEX - February 14, 2016, 9:50 am

Hahahaha ?? I was waiting for this post.

Find me the website I copied and pasted this from and I'll take full responsibility for stealing someone's work.

These are MY screenshots from MY laptop and MY writing.

Shit, I've still got the notepad file saved that I was writing it in.

Learn to back your statements up before making wild accusations.

Squats47 - February 16, 2016, 4:48 am

Very nice setup, thanks for your help.

iDuL - February 16, 2016, 4:54 am

I never heard of this program, looks like I'll definitely give it a go thanks to this thread!

UTRONEX - February 16, 2016, 6:10 am

Genesis Is Officially Dead.

Welcome Exodus!

[IMG]http://i1208.photobucket.com/albums/cc369/Sniper_/exodus_zpsswlqy1hj.jpg[/IMG]

Exodus is a brand new addon on Kodi, from the same makers as Genesis. Genesis was awesome but in the past few months has gone more and more downhill, I guessed they were working on a new project and here it is.

The streams are awesome, the HD streams are loading straight away with no buffering. Really impressed with it so far.

There are two ways to install.

1. Use my original guide on the thread (fusion config wizard). It's now part of that addon so it will install with the rest of your addons.
2. Go to Programs> Addon Installer> Video Addons> Click on Exodus and install (They are in alphabetical order).

Enjoy this addon, as always if you have any questions drop me a PM.

Glad everyone's enjoying this guide, I've put a lot of work into it so it's nice to see HF taking advantage :)

123h4ck123 - February 16, 2016, 7:47 am

Thanks OP!

Kodi Jarvis Released!

Long anticipated release for the new Kodi Jarvis (16.0)

It's actually awesome, so much faster than Isengard and some nice little tweets that really help you out, like a larger keyboard.

Remember, if you're installing Jarvis from a previous version on Kodi-

Uninstall Kodi first.

Make sure your Kodi folder is deleted, or "delete data" on the Andrpud device.

Saixi - July 22, 2016, 4:01 pm

is there anyway to make these hd or get the live tv shows hd? When I use channelpear and ccloud, they are all like 480p unless I make the size of the video really small, then it turns into hd.

UTRONEX - July 31, 2016, 11:47 am

(Jul 22, 2016 04:01 PM)Saixi Wrote: [\[CITE\]](#) is there anyway to make these hd or get the live tv shows hd? When I use channelpear and ccloud, they are all like 480p unless I make the size of the video really small, then it turns into hd.

All TV shows and movies are HD or 1080p.

However, watching the TV channels on there is a waste of time. They are really poor quality and often don't work.

I have created a guide to show you how to install the full Sky TV package on the openbox <https://hackforums.net/showthread.php?tid=5358485>

Enzio - July 31, 2016, 11:55 am

Posting here so I can find it(again) later.

JASON AND MEDEA - July 31, 2016, 12:27 pm

Vouch for Kodi. I use it for my Fire TV and it's amazing!

UTRONEX - July 31, 2016, 4:06 pm

(Jul 31, 2016 12:27 PM)Conor McGregor Wrote: [\[CITE\]](#) Vouch for Kodi. I use it for my Fire TV and it's amazing!

For streaming you honestly can't beat it. It's so simple to install and makes me wonder why people are still paying for services like Netflix or Amazon Prime.

An0nym0u555 - July 31, 2016, 5:01 pm

Is there I way I can watch free movies and series? Thanks for the tutorial but all of the channels is something I have to pay for or I need an account :(

Hey man. Yeah the thread is long but you have to follow it step by step to ensure you do the install correctly :)

If you take a look at the first page, I've split the different installs up into different posts. The first part (the installing of the addons) will install an addon called "Exodus". This is the addon that you want to watch all your TV shows and movies :)

Knowledgeable - August 7, 2016, 10:44 pm

(Aug 7, 2016 09:56 PM)UTRONEX Wrote: [\[CITE\]](#) Hey man. Yeah the thread is long but you have to follow it step by step to ensure you do the install correctly :)

(Aug 8, 2016 02:15 PM)Reverse Flash ? Wrote: [\[CITE\]](#) Damn this looks good definitely buying an android box soon.

Awesome :)

Don't forget, you can install this on any device you own.. Phone, tablet, laptop, computer, FireStick etc.

Messi10 - August 8, 2016, 2:54 pm

Im looking to buy an android tv box, this will help me..

which is better an android tv box or a windows tv box ?

UTRONEX - August 8, 2016, 3:15 pm

(Aug 8, 2016 02:54 PM)Messi10 Wrote: [\[CITE\]](#) Im looking to buy an android tv box, this will help me.. which is better an android tv box or a windows tv box ?

There's probably very little performance differences between both boxes. In terms of price, you'll probably get an android box cheaper and when you strip the OS off it, they are both essentially the same thing.

Knowledgeable - August 8, 2016, 4:05 pm

(Aug 8, 2016 04:56 AM)UTRONEX Wrote: [\[CITE\]](#) Exodus will be installed automatically on your Kodi home screen after following the steps in the first post :)

Exodus should work perfect so should all the links to the streams. Did you install the correct one for the device you're using? If it is the correct install, go back and re-install it and see if that fixes the problem.

Knowledgeable - August 8, 2016, 11:54 pm

Try that for a start. However, Exodus should work no matter what but yeah give that a shot and see if it works.

Fingers crossed :)

Just a little note- I've check Exodus on my laptop and android boxes and it's working fine so it's definitely not an addon problem ?

Knowledgeable - August 9, 2016, 4:04 pm

It depends on what kind of user you are as what kind of experience you're looking for.

With myself, I'm more of a stripped back, nice and basic setup user. I like having the addons there that I use and nothing but, keeping it nice and clean.

Some users on the other hand enjoy having an impressive looking interface that looks more like an entertainment system. That's why builds like "the beast" we're first released.

It's just personal preference. Whichever one you like the look of, go for it :)

PLEASE NOTE: It has been brought to my attention that "The Beast" tutorial is no longer working as the links have changed. I will re-write the guide tonight with the updated links.

Knowledgeable - August 9, 2016, 11:37 pm

ok, well i just want to be able to watch HD movies and sometimes shows without having to download them all of the time.

jsquared - August 9, 2016, 11:44 pm

It's really easy for finding streams and there has always been streams of football. However, for sports I would use my other guide in my sig for the Openbox tutorial as the quality is much better. Kodi is best for movies and tv shows, for live streaming it's not too good.

(Aug 14, 2016 04:23 AM)Frankey Wrote: [\[CITE\]](#) This was a great tutorial, loved it! :D Thanks

I'm french and i'm looking for something like that, thanks ! (like a pirate decoder)

Hey man. There are thousands of addons on Kodi that cater for everyone's tastes and preferences. If you want something specific I would go to google and type in, for example "PPW French Kodi Addon" or whatever. Once you find one, it will give you a repository to install from. To install it's very similar to my guide but if you need any help with it just drop me a PM or reply on this thread :)

FRI?DBAO™ - August 29, 2016, 8:24 pm

just using it on my laptop atm

UTRONEX - September 3, 2016, 12:59 pm

(Sep 3, 2016 08:47 AM)Celtic Wrote: [\[CITE\]](#) just using it on my laptop atm

Uninstall Kodi on your laptop, make sure you tick the box "remove all settings blah blah"

Re-install Kodi following my guide.

Check to see if it's working. Use the addon "Exodus" if it's not working on there then it's something at your end because I've literally just checked the streams on there and they are working fine. I'll help you out with that if it is that :)

.Satellite. - September 4, 2016, 2:18 am

Fair warning, Kodi is 100% legal. The add-ons you can install may include pirated material which is illegal in the United States.

UTRONEX - September 4, 2016, 1:32 pm

I have a question. Some things I click in navi won't open or play?

UTRONEX - September 29, 2016, 3:52 am

(Sep 24, 2016 05:22 PM)Saviorr Wrote: [\[CITE\]](#) I have a question. Some things I click in navi won't open or play?

There could be a number of reasons for this:

Your ISP is blocking the stream

The stream is outdated and hasn't been deleted

Navi is an old addon now, there are much better alternatives out there :)

axlar - September 30, 2016, 3:14 pm

Thanks OP for the info ?

UTRONEX - November 20, 2016, 11:10 am

Replied to all questions about Kodi. Sorry for the delay, haven't been on HF for a while! :)

zFacetious - August 6, 2017, 7:43 am

Damn dude I have had nothing but issues trying to get kodi to work for me, this looks awesome hopefully it works for me, thanks for the time you have put in this and for sharing it with us!!

THIS GUIDE IS NOW OBSOLETE!

I WILL WRITE A NEW ONE SOON.
