=====

?Fact Of The Day?

1.3 million Earths could fit inside the sun, an average-sized star.

=====

?E?TR AS?

The sun is nearly a perfect sphere.

Its equatorial diameter and its polar diameter differ by only 6.2 miles (10 km).

The mean radius of the sun is 432,450 miles (696,000 kilometers), which makes its diameter about 864,938 miles (1.392 million km).

You could line up 109 Earths across the face of the sun.

The sun's circumference is about 2,713,406 miles (4,366,813 km).

The sun contains 99.8 percent of the mass of the entire solar system.

The mass of the sun is 1.989×10^{30} kilograms, about 333,000 times the mass of the Earth.

=====

?Fun Fact ?

The sun is actually yellow not orange,red,blue or green [and yes from other planets you can see the sun with other colours]

Hard to read but good. If you just put little effort in design, add some pics like header or something this will eventually become big and well known.

Yes i did some research to get the best information i can and i simplified it in this thread.

You could do the same thing i did and it will not be considered as copying me.
but there is some people out there in other forums just copying my same threads.
So to make sure that i am the one who wrote the thread i write the current date and time.

I will not say something from my head and tell it to you as a fact because i might be wrong.

I do some research to make sure that my information is right and to make sure that i am not telling you something wrong.

The purpose of this thread is to increase your overall knowledge.
So don't hate.

(Jan 24, 2016 09:29 AM)?Vex Wrote: [\[CITE\]](#) Rest in peace my the more you know
Bro keep doing the thing you were making nobody will say no to you.

your threads [the more you know] was about writing a fact

my threads [fact of the day] is about writing a subject [which is a fact] and writing more information about it.

Whatever,what we do is for HF members,sharing the knowledge with people [same goal]

So don't stop making ur threads.

I facepalmed after reading this, because some of the most crucial facts and details explaining everything are oh, so flawed and out-dated, I'm afraid.

#UPDATED: Removed date and time due to people complainings.
