Thread: [Putty Booter/ Host Booting Help!](#)

ThePure - January 24, 2016, 1:26 pm

I have wanting to make a host/putty booter for a long time but i have very little knowledge about them. I would appreciate if any one can list some good hosts that i can create a putty booter with. \$10-\$15 price range?

Check the marketplace. Plenty of members could help you out there.

D_MuLa - January 24, 2016, 2:32 pm

you can search that on your own

Staunching - January 24, 2016, 2:50 pm

all you need to buy is a server and put scripts on it.

make sure when you buy the server they don't ban for ddosing. dont use digitalocean

Ventriloquism - January 24, 2016, 3:15 pm

Make sure you get a dedicated server. Ones that aren't dedicated will generally ban you for running dos scripts.

You're one of the skids I hate. It is not a "PuTTY Booter" its a VPS with a DoS script.

PuTTY is an SSH Client.

as for your question, buy a host that allows header modification and spoofing, find a good script, scan, and upload.

Do your research.
