Thread: [Trinity RGH not booting](#)

Lives - January 24, 2016, 6:04 pm

For some reason, I've been having this problem with my Trinity RGH. I go to turn the console on and it gets to the Xbox 360 Logo and shuts down. Really irritating.

Please help me because I've been trying to figure this out for a while and I'm trying to get back into the modding scene. Its been driving me nuts because its a beautiful console just sitting and collecting dust.

Scortex - January 24, 2016, 6:05 pm

Turn on the console, as soon as green light is on press the eject button, make sure to go to dash launch and clear all plugins using Y.

What this does is bypasses all the pkugins, you have a plugin issue that's all.

Lives - January 24, 2016, 7:00 pm

Here is a video of the RGH trying to boot. I've also tried pressing eject button after lights flash.

Open a text doc don't type anything just leave it blank and save as Launch.ini put it on a USB. Put the USB in your Xbox and try to boot if that doesn't help pm me and ill tell you some other stuff to try. :)

Scortex - January 24, 2016, 7:11 pm

Are you on the latest dashboard?

Lives - January 24, 2016, 7:16 pm

yes on latest dashboard. I just fucked up really bad. had my USB plugged into my laptop to my DeMoN chip. Ripped off the piece you plug USB into. SO PISSED OFF, what else can go wrong!!!! :(

Scortex - January 24, 2016, 7:20 pm

Damn, dude thats really messed up, I see your a Pac fan too.

I am beyond pissed! And pac fan as in Packers? aha you might have saw the basketball picture with a flame on it

Scortex - January 24, 2016, 8:18 pm

NO Tupac Fan i saw the pictures

Oh wow lol didn't even cross my mind when you said Pac, had me confused! Really thought you

meant packers. but yeah, definitely a tupac fan lol.

Did you recently update to latest dash?

Zach_Farlow - *January 25, 2016, 12:00 am*

bro why not plug a usb into the front with a clean launch.ini file and turn it on with the usb plugged in shouldnt that fix it?

Flaming Hot Cheetos - *January 25, 2016, 2:12 am*

I just made a blank launch.ini file on a USB and plug it in To fix stuff like that..

How did you get ur Xbox to make that noise?
