Thread: [\[Safety . Protection . Prevention \] 961API Licensing System Version 2.0 Coming Soon!](#)

EagleEye - January 26, 2016, 12:51 pm

[contract=tid]Start Contract[/contract]

Only3 - January 26, 2016, 12:58 pm

this project became the best free licensing system and the cheapest paid you can find
i remember how its start and its very impressive good job 961

AnonCensored - January 26, 2016, 2:41 pm

vouch for the best free licensing system!

Scapula™ - January 27, 2016, 7:51 am

Vouch for my bro and his license system i use from more than 1 month and all work perfect!

270z - February 8, 2016, 3:24 pm

Vouch, very nice licensing, very easy to add into my app. Hope we can work together for some features I am interested in :)

Lambasoft - February 15, 2016, 2:29 pm

Very nice system indeed.

OP is really friendly and knows what he's doing. He got my vouch!

Nachfolger - February 15, 2016, 2:31 pm

Looks and sounds cool. Goodluck op.

(Btw, the website loading time was a bit long for me, maybe that's only me)

EagleEye - February 15, 2016, 2:40 pm

thank you ^^

for the speed we have best servers out there running this website

<http://tools.pingdom.com/fpt/#!/d4KeTg/https://961api.com>

Perf. grade

76/100

Load time

860ms

Shorta - February 15, 2016, 2:50 pm

Can you tell me why I should change from Netseal to this?

Also would an autobuy system be easy to put up on my own website?

EagleEye - February 20, 2016, 9:10 am

One thing for sure, 961API posses features never seen on any other License System. We have a group of developers fully dedicated to enhance and keep 961API on the top.

We can't really convince you to switch, but what I can do is offer you a free trial, and hopefully you can judge yourself.

French Products - April 10, 2017, 3:18 am

Probably the time to bump it.

As maybe you know NetSeal will be closed in a bit more than a month, hopefully your product is great and able to replace NetSeal. ?

EagleEye - April 10, 2017, 1:02 pm

thank you ^^ ill need this for my next version coming soon if you like to join our Beta List pm me

severos - April 13, 2017, 10:53 pm

I'd like to know how exactly this product works in background to find out if it's a secure by design system

Secret Agent - April 14, 2017, 7:43 pm

Does it support C# programs?

NonLeaf - April 14, 2017, 7:46 pm

Posting to keep updated on this.

EagleEye - April 14, 2017, 10:45 pm

(Apr 14, 2017 07:43 PM)Secret Agent Wrote: [\[CITE\]](#) Does it support C# programs?if you heard we are workign on version 2 and it gonna support 4 to 6 langs but first release vb.net and C# supported and by time we will release langs ...

EagleEye - April 23, 2017, 10:25 am

Licensing Public Portal

severos - April 23, 2017, 10:59 am

I still would like to know the answer of my previous question please.

What exactly would you like to know in terms of the background work?

severos - April 23, 2017, 9:01 pm

The concept it works by, like does it pack app files in some hidden place and unlocks them after validation? or what exactly?

M00nD3v - April 23, 2017, 10:06 pm

Same question from me as well and what about autobuy system?

EagleEye - April 24, 2017, 1:35 am

(Apr 23, 2017 10:06 PM)NoCTRL Wrote: [\[CITE\]](#) Same question from me as well and what about autobuy system?

those are features can be implemented later on !

I am developing a platform that i can add modules easy to manage for future

for pack and unpack , ITS a licensing system

how does your antivirus check for license ? does it pack and unpack ?

and for validations for sure there is validations and everything you need to ensure none manipulated your application

and no its not like netseal, i don't copy others ideas or the same schema
who likes to enter Beta there's is few spots left for that and you can see that by you self!

ruGaming - April 26, 2017, 3:00 am

I'm happy too have grabbed one of these spots. I seen 961 back when and seeing it being upgraded pleases me. Clean dashboard, extremely easy on the eyes and user friendly. Excited to launch my first app in years.

EagleEye - May 2, 2017, 8:00 am

revealing some surprises for the upcoming of version 2...

the best part when you don't have to worry where to upload your files anymore, everything you need in one place even CLOUD Systems! no need to find hosting or FTP ...

961API covered your uploads with CDN Cloud Files "powered by RackSpace" best quality and up to 500MB for free for everyone!(it may be change after i release it)
