Thread: [\(Public\) Skype Ban Method \(Public\)](#)

Bob White - January 26, 2016, 1:39 pm

The public skype ban method has been around for a long time, and many people have put their own stamp on it, their own curve, whatever you wanna call it to make it "theirs". This method is owned by nobody, and known by many. I did not make this method, nor do I claim to have any rights to it. What I do know is thousands of people have the method and it's publicly shared.

The truth is, this method is the same no matter who does it, they just make the complaint at different departments and use different types of harassment.

The public skype ban method is free, use it, abuse it, don't target any HF members or baby jesus will cry.

You can get it [RIGHT HERE](#)

Feel free to vouch to keep the thread relevant!

The fact that this actually works just proves how retarded support people are.

This is 100% true. Microsoft employs third world countries for their support.

Vouch for this, old but working method.

You can use a account cloner to clone your target's details to your account (Profile picture, mood message, name), just makes it easier.

Legit Pandas - January 26, 2016, 4:23 pm

I might just try this out sometime...haha thanks for the share :D

So what? If you didn't already know the method are you seriously upset that you have to wait 5 seconds to learn it to earn OP a penny?

YayHar - February 14, 2016, 8:12 pm

This is being sold? Damn dude.

I thought this was just common knowledge. Didn't think it was that successful, though.

Thanks a lot bro for sharing.

Bob White - February 23, 2016, 8:36 am

Public method, don't waste your money buying it from someone who claims their method is different. There is no different method, everyone uses the same baseline for their bans. The only thing that differs is the department they speak with and the type of harassment they claim.
