I'll shae a secret wiht you ;) manny of those youtubers use:

www.picmonkey.com

FREE and easy to use, slap a pic and do stuff!

If you want your face on it I sugest you do a pic on a greenscreen(I have a blanket that works just fine, you can een use spmething like a paper) edit the green out in a editor(vgas or so) let transparent BG and then add the BG you want as the BG on Picmonkey and then add layers of your face and teks.

It seems endless, it is endless untill you master it, then it takes just 5 mins.

Yeah...I checked em up, they like started not giving free edits anymore, goddamit!

I used that regularly...

I did though found this one:

https://www.ribbet.com/app/?edit_photo#/edit/advanced

similar, but not the same ?

If you're still open to help, I'm willing, I'm extremely fast at doing thumbnails as I've done it specifically before :)
