Thread: [how do I hack phpbb forum website like this one?](#)

magic mexican man - January 28, 2016, 8:13 pm

How do I hack Phpbb forum website like this "denkindonuts.com/" one.

I did scans on it but I couldn't find any vuln or anything else. I found the index and admin page thats about it.

I'd probably start with this:

Code `http://denkindonuts.com/donate/store.php?page=`

I got it from googling:

Code `site:http://denkindonuts.com/ -forum`
