Thread: [\[HELP NEEDED - PAYMENT OFFERED\] Website Creation!](#)

KickAss942 - January 28, 2016, 8:28 pm

Please read the full post before bothering to comment, I'm honestly not interested in childish arguments where you believe you're right and everyone else is wrong... (not trying to be mean, love's in the air)!

Alright so my upcoming project will be something amazing for everyone, it is free for usage but some features (DDoS function, IP Blacklisting from resolvers, Email Blacklisting from resolvers, Profile Blocker, IP 2 Skype Blacklist - which will cost 2\$ per (5\$ for the DDoS), and 10\$ for full blacklisting - example: try resolving kickass.bot once the project is finished). Anyways back to subject....

Okay so I'm in need for a website for this project, so I'm willing to offer some payment or a free blacklisting & ddos function LIFETIME (whichever you believe fits best to you). It MUST have a database, either MySQL or just normal MSSQL does not matter I can code using both languages.

What do I need?

I need a website that includes the following features.

- Remember: I do not need YOU to code the page for me, just to DESIGN it.

1) Home Page:

- Awesome style
- Create your own logo saying "KickAss Skyp-ton" (the name).
- Amazing background.
- Nice visual effects to make it look professional.

2) Login/Register Account Page + Cpanel.

3) Statistic page with list of:

- Active users.
- Current resolves for the day.
- Total resolves.
- Total blacklisted addresses.

4) Payment page (stand-alone) where you get to chose between:

- 2\$ per blacklist or 10\$ (+5\$ per month to continue to DDoS, only 10\$ for starter package included DDoS function) for full package.
- Email 2 Skype
- Skype 2 Email
- Profile View Blocker
- IP 2 Skype
- Skype 2 IP
- DDoS Function (API Key) (5\$ stand-alone PER MONTH PRICE - due VPS needs to be paid per month).

5) Online FREE Tools Page:

Direct communication tools using Skype Service IP.

- Resolvers, Viewers, Trackers and more!

6) About, Help & FAQ Page:

- Skype Logo (function to click on logo and add the creator (me) on skype).

Why do I need this?

I need this because my up-coming project will rock! [Check it out for more information](#)

That's everything that I need, you all got the chance to show me what you make. Feel free to either post pictures in a comment below or just add me on skype if you feel like you need to contact me before: mohammedhajjar96

This is my first post inside this section, I'm trying my best to follow the rules and not stomp on anything. Hopefully there will be no problems regarding this post and honestly, no scam... You can be paid before sending the files, but the work HAS to be done before you get paid - due earlier situations....

Thanks for taking your time and reading this, hopefully we can come to an deal at the end!

T0ucaNSaM - January 29, 2016, 5:56 am

So basically you want a site that displays this basically??

2) Login/Register Account Page + Cpanel.

3) Statistic page with list of:

- Active users.
- Current resolves for the day.
- Total resolves.
- Total blacklisted addresses.

4) Payment page (stand-alone) where you get to chose between:

- 2\$ per blacklist or 10\$ (+5\$ per month to continue to DDoS, only 10\$ for starter package included DDoS function) for full package.
- Email 2 Skype
- Skype 2 Email
- Profile View Blocker
- IP 2 Skype
- Skype 2 IP
- DDoS Function (API Key) (5\$ stand-alone PER MONTH PRICE - due VPS needs to be paid per month).

5) Online FREE Tools Page:

Direct communication tools using Skype Service IP.

- Resolvers, Viewers, Trackers and more!

6) About, Help & FAQ Page:

- Skype Logo (function to click on logo and add the creator (me) on skype).

My Advice is to find a web template you like for free and I can help you fix it up or give you advice. However the best route would be a nice template.

Also show us some sites you like as examples

I'm glad you understood, yes that's exactly what I want and that is why the payment is not so high because this is easy work. But I need design for this, I can code it myself and use my own template based on your designs... but Logo, Background, icons, etc... And please add me on skype so we can talk, easier than posting a comment each time ^^

T0ucaNSaM - January 29, 2016, 6:26 am

lol im l33t bro I dont use skype or anything that has a front camera. However if youd rather PM on here we can talk more. Im at work but I do IT sooo im literally always on the computer.

bass booster - January 29, 2016, 9:41 am

I don't use skype, but I thought I read somewhere the latest update BLOCKED skype IP addresses from being seen?

Again I don't use skype so I don't look it was linked on here so I read it (lol)

Here's the skype blog I seen it on

<http://blogs.skype.com/2016/01/21/to-our-gamers-ip-will-now-be-hidden-by-default-in-latest-update/>

Open the thread link in the first post and checkout, Microsoft can never be smarter than hackers.... they simply suck :x

Anyways they has a lot of holes in their project even errors for some reason, but yeah I managed to figure a way to 100% grant correct IP Address and information.
