<http://lmgtfy.com/?q=folder+Lock>

That will bring you to Folder Lock web site.

I haven't used Folder Lock before so I don't know if this will work, but do the password locks still stay when you uninstall Folder Lock?

BOOT IN SAFE MODE AND OPEN LOCKED FOLDER

Booting in safe mode ain't working! The files are totally secured... Damn! I just lost my 12 letter password and there goes all my data... Haha! Luckily I hadn't setup a uinstall password yet.

If you uinstall, you will lose all the hidden data!
