Thread: [\[Rendering Service\] Cinema 4D/After Effects](#)

??WuhTehFuh?? - January 30, 2016, 2:03 pm

If any of you need your Cinema 4D/After Effects projects rendered fast then I'm offering the services of my computer to do it for you here:
<https://uk.fiverr.com/s2/78b6d280ef>

Specs:

AMD FX 9590 8 core processor (5GHz)
32GB of 1866mhz RAM
AMD R9 390 GPU

I also have secondary computers to boost the rendering with the following specs:

AMD Quad core 2.6GHz processor
8GB of RAM
HD 4870X2 GPU

Intel Quad core 2.7GHz processor
8GB RAM

Honestly I think the five dollars is a bit of a rip off for simply running a program and letting it render. Even people with weak computers should be able to do this if they leave it over night... Also people often have to make minor edits render after render to achieve a result they want, will you charge for re-renders as well?

Add blender rendering to the list
