cheddattack - February 21, 2016, 9:43 pm

This is basically another teapotlive v2 source prntscr.com/aocpbs

Not saying anything bad pilotmaster737 just letting people know what source it is, great job on getting another server up and going by the way.

did you just joined to post about pilots server? anyways since your first post was about this stealth i will love to see your second post as a thread with a free stealth server like ninja. if you cant do that well boy you just another RANDOM who claim they know it all . instead of making something better your just trying to destroy.

but i see the hate for free stuff posted here alll the time.

it isnt about a stealth, is about ppl who hate the person next to you do good.
