Thread: [Custom Webmasters Traffic/Social Exchange Site](#)

**Ricki** - January 31, 2016, 2:40 pm

AdminPlan was originally going to be dedicated for just a blog with a forums but that was to original and standard. I have chosen to make something that will have a lot more attraction and will attract a load of people from everywhere and that's with out really hard SEO getting involved.

What I wanted to know what is everyone point of view on this, please.

would you like to see something like this?

What features would you like to have?

What members features on the members control panel would you like to have?

Is there any other additional question you have?

Thanks in advance, Ricki

Thanks for your reply here is quick run down on everything:

Features:

- Traffic Exchange
- Social Exchange
- Referrals
- Points Transfer
- Points Withdraw

How does it work ?

After registering on AdminPlan the member will need to add a website. Normally a user will have 100 points in his account when another user visits his website, the points will be deducted, so the users cross visits each other websites in order to increase their own points .

How Traffic Exchange Session Works?

A member will just need to click on start session button and allow pop ups and chill out while the traffic exchange session will automatically open other websites on a regular interval of 30 seconds and the member points will be automatically be increased.
