Thread: [Bring Back NSFW HF!](#)

minimalist - February 1, 2016, 4:41 am

Simple suggestion. The servers have been upgraded, the firewall hasn't been acting up much, so I think that we should get NSFW Hack Forums back.

In case you didn't know, hackforums.net used to bring you to a version of Hack Forums that didn't display any images. It was a nice way to save bandwidth or just hide what you were looking at from people in a public setting (school, work, coffee shop, etc.)

Thanks.

*by the way, I know that you can just disable images in the user cp, but that is less convenient than just having a url to do the same thing.

Was about to mention this when I saw it.

Well, I don't think it would be needed anymore.

Inserenity - February 1, 2016, 4:51 am

Had a different idea of 'NSFW HF' when I clicked on this thread.

I am disappointed.

GreyHatZone - February 1, 2016, 4:53 am

This seems like a good idea because it would be a hassle to keep turning the settings on and off lol

When I saw this I thought you were talking about a porn section for hackforums Imfao (° ? °)

No, no dirty things for us on HF ?

Mr. Robot - February 1, 2016, 5:02 am

I like the idea of SFW.hackforums.net

Basically the same thing, but instead of removing images - it replaces them all with "work related" shit :)

Ghost Rider™ - February 1, 2016, 5:03 am

I remember using that, it will be nice to have it back.

Cammy - February 1, 2016, 5:04 am

Or you download an extension to achieve the same thing

Granny Bacon - February 1, 2016, 5:08 am

I also want a NSFW version of HF, could be useful in some circumstances.

Not that impressive to see my signature replaced with some stock photo from Shutterstock.

Granny Bacon - February 1, 2016, 5:13 am

(Feb 1, 2016 06:10 AM)reve4 neeuQ Wrote: [\[CITE\]](#) Not that impressive to see my signature replaced with some stock photo from Shutterstock.

Indeed. Just an hackforums.net is enough which will disable all the images.

????ll?? - February 1, 2016, 5:14 am

hmm this would be a great idea though

ha4x0r - February 1, 2016, 5:15 am

wont happen omni will prob tell you go to reddit

minimalist - February 1, 2016, 5:16 am

Why did he add it before then?

wellager - February 1, 2016, 5:16 am

I agree, I also miss the nsfw version of the forum. Probably got used to it when my net was crap

minimalist - February 1, 2016, 5:17 am

Here's the thread where he announced the feature, by the way:

teasing the noobs?

44krieger - February 1, 2016, 5:26 am

Damn, i would love that. Was to late to catch it though.

AsSaSs@iN - February 1, 2016, 5:27 am

In the meantime you can use Lite mode: <https://hackforums.net/archive/index.php>

Doesn't remove images in threads however.

Dragon. - February 1, 2016, 5:29 am

Personally I would love to see this come back. I used it quite a bit on mobile while it was available.

You can't just install userscripts on mobile. The settings you can toggle in the UserCP don't remove the logo, either. This would be great ^_^

iLogic™ - February 1, 2016, 5:38 am

Yeah. Im supporting it - it should be very useful.

Karnaugh - February 1, 2016, 5:52 am

Me too. OP you're a mess. Don't make people join your thread like this.

CRT - February 1, 2016, 6:50 am

I'd like this to happen. You have my support. ?

Duk. - February 1, 2016, 6:53 am

I can make a userscript real quick if ya' want.

Same here. ?

Was expecting something different..

Hash G. - February 1, 2016, 8:52 am

NSFW was disabled due to Succuri not supporting it. You may want to check this out though :

<https://hackforums.net/showthread.php?tid=4840130&pid=46330648#pid46330648>

Ronaldo. - February 1, 2016, 10:12 am

I'd like this to happen. You have my support.

?LIXI? - February 1, 2016, 10:35 am

I thought it's something dirty when I read the title ???

This would be great. I support it.

Niko - February 1, 2016, 11:10 am

This would be great, I support it!

YinYang - February 1, 2016, 11:30 am

This has been discussed before,
but yet again, my 100% support.

Would love to see this come to fruition.

sevv - February 1, 2016, 11:42 am

(Feb 1, 2016 12:32 PM)blessthefall Wrote: [\[CITE\]](#) I support this. Best way to browse on mobile, and don't have to work about the "Hack Forums" logo on the top if I use my Surface.

I support this, but I have a fix for those for only desktop on Chrome, download Ublock Origin, right click the HF picture, click block element and go over to the box and press create. But I really want the nfsw site

Hellsing - *February 1, 2016, 11:46 am*

Wouldn't it be SFW?

But I hardly used hackforums.net, only knew it was a thing because of somebody in a Skype group.

Stashyy - *February 1, 2016, 11:47 am*

I'd love to see that happen. I would use that all day. :)

Omniscient - *February 2, 2016, 1:46 pm*

I might in some form but really not sure I will.
