I offered to sell sc0rpion the source code to brute cracker:

<http://prntscr.com/9xwa17>

Our convo on skype:

here are the people he turned around and sold the source too, as well as refusing to pay me:

<https://hackforums.net/showthread.php?tid=5155694>

<https://hackforums.net/showthread.php?tid=5153448>

I'm sure there's more..

tl:dr

offered to sell this user a source, he said he'd pay after seeing it, then told me it "didn't work" and proceeded to sell it to 2 other people

Looks Legit. Hopefully this can be cleared

Good luck.

The source you sold me was outdated and didn't even build properly / didn't build at all, so I went around and got a working source myself while checking to see if this thing was cracked...

Here you admit the source doesn't work:

Yet now you are denying it?

Spoiler [\(Click to View\)](#)

WHAT YOU SOLD ME:

Spoiler [\(Click to View\)](#)

Outdated, source code didn't work, tons of errors...

WHAT I SOLD:

Spoiler [\(Click to View\)](#)

EDIT: Also the crap you sold me WAS cracked / leaked on LF. Yet you denied it:

1. There's some bugs while compiling in VS 2015, probably cause it was made using 2013, but you weren't using either of them.

Errors != not working

2. The compiled version was not the same as the source correct, but you compiled the source and changed the color and were selling that, without having paid me anything at all.

That doesn't change the fact that the cracker I was selling was not the one you sent me.

I sent you two things:

An unlicensed cracked program (you didn't sell this)

And the source for a cracked - which is what you were selling to other people, all you did was change the blue to a red.

For those of you that are wondering, this is the GUI from the source code i sold him:

<http://prntscr.com/9xx4el>

Now tell me, it's not the same thing

If you don't mind I would like to compare the sources.

It's invalid, everyone already knows that.

But like anyone that makes a deal dispute or CA, they don't actually expect to get paid back its just to warn people not to deal with him.

And nobody knows it was invalid because it wasn't?

You blocked me on Skype and sold the most public method I've ever seen in my life.

I didn't, because I didn't scam you, you just refused to follow my instructions and constantly wanted to do it your own way with 0 knowledge of it, lol.

I never blocked you on skype, and if it was so "public" why didn't you say anything about it when you first bought it?

Take this to PM's if you want to continue.

You have me blocked on HF too lmao,

Why the fuck are you lying?

<https://hackforums.net/showthread.php?tid=5092659&pid=49664894#pid49664894>

You had no fucking idea if it works for UK and I stated I wanted it to work for uk.

I followed your instructions even for chipotle on US which you just ignored me and they asked me for the store and receipt lmfao

I knew it was public but didn't say anything thinking it could possibly work because if it works why would I care if I made my money back but no. It's literally common sense and a pile of shit.

I will haunt you on HF til I get even a partial refund so yeah xx

You gave me a cracked, not working source that you lied about. That wasn't the deal. No thanks.

Wasn't cracked, and it if was "not working" why'd you sell it to a few people?

Once again, I didn't sell the same source you sent me. I searched on my own and got a working source from someone. If it was the broken source you sent me, it wouldn't have worked to the guy I sold to.

This is still up and legitimate, DWC.

Stashyy - May 31, 2016, 6:07 pm

Was this still not resolved? He tried selling a public method and got exposed.
