Thread: [Digital Ocean | 20 Servers | First come first serve \[NO SERVERS LEFT\]](#)

Verizur - February 2, 2016, 2:21 pm

EDIT: Just got a message that I had reach my limit of creating 10 servers. I'll let the servers go for 2 months instead of 1 to complete this giveaway.

I got \$100 on my DigitalOcean account left after switching over to OVH.
I don't have any need for this so I thought why not just give it away.?

To get this, simply send me a private message telling me what location you want your server in and what OS you want. These are the locations:

- New York
- Amsterdam
- San Francisco
- Singapore
- London
- Frankfurt
- and Toronto

The specs are simply 512 MB ram, 20 GB SSD and 1000GB Bandwidth.

*I will not send you a PM with server details unless you send me a PM first as that would break this rule:

Quote:6. No requirement to post to get PM (post to PM).
