I don't have all my proof from previous CPA adventures only these because my paypal was hacked and I deactivated it thus meaning all of the payment slips are gone but I have these:

They aren't as big as what I'd normally get but I did these while I was busy doing assignments, presentations, writing this book and writing reports.

Terms of Service:If you buy the book you agree to the terms of service.

After having taken a look at the eBook, as a beginner I'd definitely say this guide includes everything someone who is looking to get started in CPA would require. It's a very detailed book so you know exactly what to do and how to begin, and also includes some methods which I've never come across before. So for \$19.99 not only are you getting a great eBook you're also getting support from the man himself who knows these things inside out. It's a deal you can't go wrong with. Yes; it does require some effort to get started, but with the support and help from NoMercy this shouldn't be an issue and you'll be ready to go in no time, and the effort seems minimal when you look at the possible returns.

This eBook definitely has a lot of potential and I shall be using the methods myself personally because I can see them working.. and if they don't, I can just message OP and he'll sort me out so it's a win-win ?

Consider it a small investment for a big return. Author provides plenty of detail, clear easy to read layout, and tons of tips and tricks to help you.

The OP himself seems really friendly and has replied to my private messages near enough instantly whilst he's been online. You have my vouch.

Grammar: 8/10 - Few grammatical errors but nothing major, eBook is still clear and easy to understand.

Layout: 9/10 - Laid out quite nicely, everything is set out clearly and with headings, easy to read and understand.

Method: 9/10 - I've not seen most of these methods before or even thought of them. Score from MY perspective.

Complexity: 6/10 - For someone who isn't good with computers, there could be a few problems setting up, but OP would help resolve.

Good luck with sales.

Originality: 8.5/10

This ebook is very unique. You have most likely never seen this method before. I have encountered a method with a similar idea, but nowhere near as genius as this! Don't worry about the method getting saturated either, since there are so many different options.

Ease of Use: 8/10

Setting up the actual method may take some time, but that's expected with anything that can earn you TONS of money. The layout of the ebook itself is very easy to follow. NoMercy is basically spoon-feeding the reader with success.

Grammar: 9.5/10

The grammar was nearly perfect and the writing was very easy to understand. It is clear that lots of time and effort was put into making this ebook.

I noticed only a few grammatical errors.

Layout: 10/10

Like mentioned before, the ebook is extremely easy to follow. It has step by step instructions, image examples, a vocabulary section, and many different sections and subsections.

Overall: 9/10

CPA Bootcamp is a great ebook with the potential to make you thousands! The method within the ebook is like nothing I have ever read

before. One can follow the method multiple times to multiply their profit as much as they want. The ebook is excellent, the author is supportive, and the money is just waiting to be earned.

Proof of earnings? Paid traffic?

NoMercy - February 3, 2016, 3:05 pm

(Feb 3, 2016 10:10 AM)Ve7o Wrote: [\[CITE\]](#) Proof of earnings? Paid traffic?

Since I was writing the book for a while my proof would be way below what I normally make. I have proof that I got \$80 but that's nothing compared to what else I've done. Also, the methods only include 1 paid traffic method and the other 6 are free methods of advertisement. I include a lot of tips for SEO in there too.

Ve7o - February 3, 2016, 4:19 pm

Just show past proof then. Seems kinda weird you would stop making money to write a hf ebook

NoMercy - February 3, 2016, 5:21 pm

(Feb 3, 2016 05:19 PM)Ve7o Wrote: [\[CITE\]](#) Just show past proof then. Seems kinda weird you would stop making money to write a hf ebook

It doesn't seem weird in the slightest. While over run with assignments and presentations to finish I decided writing a book would be the best project to go with since I can do it one day and not do it next. I had a lot on my plate and still do so I stopped CPA for a bit due to it's demanding nature. However, I have a few payment slips from when I had just started the new education year if you wish to see them. They are no where compared to my free time earnings but they still show me getting more profit than this book costs. I can't show you my ones previous to that because my Paypal account was hacked so I got a new account all together and I clearly won't have access to a deactivated account.

I'm sorry if my decisions confuse you but you would understand if you was in my shoes.
