Thread: [\[Official Group - UPDATED\] - Design Request - \\$200 - \(Userbar/ficon/Logo/Divider\)](#)

.Fox - February 2, 2016, 11:09 pm

Good evening Hack Forums.

Once again, we're in need of some graphics work to be done for our new official group. This includes: a userbar, logo, ficon, and spacer.

It is now official, we have rented DARK from beslim, and it will soon be rebranded to "Capital." When we posted the original graphics request thread, the submissions were (for the most part) lacking. We didn't have very many artists submit because it wasn't exactly locked in that we would be owning a group yet. It is now locked in and paid for, so whichever graphics works wins will be used with Capital.

Message

To remind you, this group will be aimed mainly at marketing and entrepreneurial activities, as well as the promotion of HackForums' top contributors and known leaders. Along with that, much of our core values will be unknown for the foreseeable future, but quality and trust are what we hold in the highest esteem. The graphics work done for a group can often be one of the most important parts of upholding a reputation, so this is among the areas that can be nothing short of perfect. We trust you'll keep that in mind.

Dimensions and guidelines:

Logo: Keep it an appropriate size

Userbar: 136x42

Forum Icon: 40x40

Divider: Again, use your best judgement

Here are a few userbars we like, just to put your directions into perspective

In regards to the two "old style" userbars shown, I personally would like to see some submissions that involved our group name being used. Infamous' userbar was absolute perfection. Omni has banned the use of old style (grey back bar), but I'd like to see concepts based off the old ones. None of the current UBs have the groups' names used on them so if someone can figure out how to pull this off you'd score huge points.

Payment

Winner may elect to receive \$200 in BTC or PayPal for their work.

Deadline is Sunday, February 7th.

Whoever designed it had to have done it in paint. The outline is just, ew!

I started my entry last night, but had gotten extremely distracted. I will submit tonight.

It was a long time ago, I doubt you remember. Correct me if I'm wrong. It may just be my memory.

Let's keep posts on topic, I don't want another thread filled with off topic trash like last time.
