Thread: [Expired Domain Emails \(e.g. live.com, live.ca, etc\)](#)

FiftyTwo - February 3, 2016, 7:52 am

P.S. 3P1C's are accepted as well and normal users who have a good reputation score and amount of posts are allowed too.

I am aware this method is known but for those who have trouble doing it or don't want to spend their time doing it, this service is for them.

If you would like me to register you an expired domain email such as...

____@live.com
____@msn.com
____@live.ca
and so on.

...then this is the place for you! Just comment on this thread saying you'd like one, providing the expired domain and the name you'd like.

Could you make me rockboy@live.ca?

Thanks very much
