Yea, I can't actually record well at my house, so I know what it's like and don't really judge hardware quality. Just flow and lyrics. Voice and everything else isn't really relevant, and normally I would add projection, but some people aren't able to given their location.

I really liked this, and I would like to hear you rap with better projection at some point. I'm not judging on that right now though, so some key points:

- Your flow is pretty good in certain parts but I feel like you try to squeeze some words in too fast and it throws you off a bit. I'm susceptible to this as well, and since it's not professional, that's something I'll give you the benefit of the doubt for.

- Your voice is great in the beginning, but you spin off a different path as soon as you start rapping, and I think you should try to project your actual voice first because it sounds good. Again, not doing this based on projection, but just my \$0.02.

You're added to the group.

Since you said it isn't really about voice I gave it a shot.

Lmk. Mainly focused on writing lyrics in the past. Wrote better shit than this, but recording it was fun. Improvement is always a good thing.

lyrics ([Click to View](#))

I'm stepping on these snakes I don't like getting backstabbed
Thought they had me figured out I played 'em like blackjack
Every day a different day you doin the same shit
While I'm out here grinding nigga tryna make it
Throwing shots and never stress my nigga, that's Kermit
I'm shooting at you niggas while I don't have a permit
Some of you dream of driving a fucking Mercedes
But I won't stop until I'm 2x richer than Jay Z
I'm on a different level even Trump fucks with me
My flow black magic got me feeling like Quan Chi
Fuck your bae list I'm tryna fuck Kendall Jenner
Just said that shit out loud shit I forgot my manners
Spitting on that shit from Jay but this ain't a game
Sometimes I look in the mirror to see what I have become
Thinking I have changed but I'm still one and the same
You're welcome, King Cin, don't even know my stage name

That's incorrect. Not trying to be a dick, but your lyrics are ass. You just have a professional studio, so you guys can make your voice sound good.

Eminem never grew just because he can rap fast, plenty of people can do that.

It was his lyrics/story that made him grow.

The song i did was a freestyle lmao nothing was writing and it was done at 4am ... & that was done at my home studio not professional studio but thanks for your feedback.

& also Em did not grow based off his lyrics it was based off his delivery and because he didn't sound like anyone else

Not just talking about your freestyle..

Not trying to get into a argument.

But if I said "just saying swavy is coming up and talking to lyrics on a phone that does not rhyme but hey they have a music studio, so they are great!"

You would say "No, making beats and syncing sounds takes skill" etc..

I think chess isn't cool, but you might. We all have our own opinions.

But not everyone can rhyme and make the words make sense and witty..

So it is a skill, just like being able to fold your tounge is a skill to some people.

Please refer to my first post .

Now that whole thing was a freestyle now if you listened to the actual tape and said I suck then that's different . I don't care what people think of my music cause I know someone in the world maybe just one person will like what's being said .

Anyway guys good luck with the recruitment

If you care about music or want to learn how music is really made in depth, take it. It's not too hard if you're into music and I've never appreciated music like I did in that class.
