Thread: [RGH isnt connecting to internet. Help?](#)

Supremed - February 5, 2016, 4:45 pm

Got my rgh'd xbox in today.

The Mod Shop recently did my console and im trying to setup dashlauch as we speak BUT while setting up neighborhood, i tried connecting to my internet. i know my KV is unbanned unless "The Mod Shop" tried to go online It says my internet is "Blocked" to connect to xbox.

Like this:

Network: Failed

Internet: Blocked

Xbox Live: Blocked

Do you think my KV is banned? (even tho i never used it?)

In dashlaunch disable live block and you should be good but you also need a stealth server to go online.

Brass Mods - February 6, 2016, 3:23 am

As the person above me said disable live block and live strong unless you're using infernus they have their own custom settings last time i was on it.

Don't try and connect to Xbox Live unless your CPU is attached to a server that you have time on. If you do this the KV will get banned automatically. You need to be on a stealth server in order to go online with an RGH.

I recommend buying NiNJA <https://xbles.ninja/shop/>
