Thread: [\[PAYING \\$\\$\\$\] Social Automation Bot - Facebook/Instagram/Twitter \(Hiring developers\)](#)

**Raymond Reddington** - February 6, 2016, 1:43 am

I am looking to get a few projects done. Details are below.

Requiring: Skilled coder with adequate knowledge of web requests, API functionality for Twitter, Instagram, Facebook.

Work: Coding an automated AIO tool in C# (preferably) for automated commands to be processed on Twitter, Instagram or Facebook. Preferably modular system. Might require automated SMS/email verification as well.

Instagram - Create accounts (custom bio, gender, avatar, gallery + follow random)

Randomizer for all account-creation info (pic + name + bio + username, etc)

Upload pictures

Import accounts w/ proxies assigned

Export created accounts

Automated liking (custom URL, custom profile / all pictures, by hashtag)

Automated commenting (w/ spintax, by hashtag)

Automated following

Automated unliking/unfollowing (custom URLs/profiles/hashtag)

Smart unfollow (unfollow those who aren't following back)

Mass upload (post/upload same pic + caption on all specified accounts)

Mass DM (to all followers)

Facebook -Create accounts (with SMS/email verified)

Randomizer for all account-creation info (pic + name + bio + username, etc)

Automated liking (like post/page/video/comment/picture with custom URL/hashtag)

Automated following (mass follow custom URL)

Automated commenting (w/ spintax)

Automated unliking/unfollowing

Smart unfollow

Automated inviting (mass invite people to a event)

Automated adding (mass adding people to a group OR group conversation)

Friend Requests panel - mass send requests to people with common location/college on profile / accept/deny all incoming friend requests / add random friends

Mass message (page/contact or all contacts)

Mass upload (a specific video/status/picture)

Twitter - Create accounts

Randomizer for all account-creation info (pic + name + bio + username, etc)

Automated Liking/adding favorite (via URL/hashtag)

Automated commenting (via URL/Hashtag using spintax)

Automated following (via URL)

Automated retweeting (via URL/hashtag)

Automated unfollowing (via URL/smart unfollow)

Mass tweeting / broadcasting (simple post)

Mass upload (picture + caption)

Since this is a lot of work, I am offering a large sum of money as reward. You will be well paid.

Prices are negotiable

Contact me via PM.

**DamienVC** - February 7, 2016, 2:31 am

Good luck getting this done m8

**Raymond Reddington** - February 7, 2016, 2:59 am

No one's skilled enough to do this? :ROFLMAO:

**Lovely?** - February 7, 2016, 3:03 am

This is a pretty hardcore task, you'll get more luck finding someone who can code this by hiring an

actual coder with knowledge in the fields already. Automatic SMS verification/text verification can be a bitch.

Also I'm working with Facebook on a daily basis, PM me. I see a huge issue and a way easier way to avoid it.

**SpyGuyz** - February 7, 2016, 3:06 am

that's a big project for social media panel good luck .

**DamienVC** - February 7, 2016, 3:51 am

Automated SMS verification through site API is possible.

Email is more easier

I'm sure the pay is definitely worth it.

the whole thing is unnecessary for Facebook though.

**+Haze** - February 7, 2016, 4:13 am

I can do this, but busy it's a big project and might interfere with my IRL life. So therefore, I can point you to the right person, I know and can vouch for someone that I know that can do this, however, I'd need to know your budget because he doesn't accept chump change. If interested PM me.

**DamienVC** - February 7, 2016, 4:26 am

Yes. It depends upon how the account creation is handled. Bypassing mobile verification is possible (at the time of registration), but the accounts might die off as Facebook does prompt them to add and verify a number at a point.

Yep, I'm aware of it. It's a big project. I'm willing to spend the optimum amount for getting it done. Please get a quote from your friend about it!

**DamienVC** - February 7, 2016, 5:03 am

Wow, cool sales tag on this mate! ?

**NCORE Tech** - February 7, 2016, 5:17 am

I wish i could do this job.

**Mons** - February 8, 2016, 10:35 am

Good luck finding someone for this project, Raymond.

If I wasn't busy dominating the SST market, I could get this done for you within days.

**Raymond Reddington** - February 9, 2016, 5:20 am

Found a coder for now.

Will re-open if needed.

Thanks.
