With the new update Apple checks the software for valid hardware changes done by a technician so I don't think this will work now

I'd rather pay the premium instead of doing this shit. Seems very tedious.

Holy shit, I need this lmao, I never have space.

If you could learn to do that and set-up a business you could earn quite a lot of money from it, if Apple don't prevent you from doing so legally.

Seems like a hell of an operation, but it's definitely worth it.

Bluffer - February 6, 2016, 5:29 pm

That'd be worth it 100% or you can just not buy a stupid iPhone?
