Thread: [offering free help with IRC botnet setup!](#)

freeNwild - February 8, 2016, 3:45 pm

Hey guys, I have been stuck for a while setting up IRC botnets, but recently, I learned a lot about them and to give back to the community, I am offering to help people who are where I used to be! :) If you think I'm trying to root your server, or scam you (lol its free) then please just don't buy I don't need the hate :)

Peace!

Why would you ever help a bunch of kids setup their "botnets"? Do you think you're actually doing something good here?

I wouldn't mind some basic help on getting into botnets, I've been messing around with RATS for a few years and have decided to do some research into botnets, they seem pretty cool

This guy has been messing with RATs for a few years, everyone. I take it you must be some kind of blackhat hacker.

Pasha why you getting so grumpy the dude is offering help for free ? what is your problem ? its not

like the guy is asking you for anything or doing anything to harm you ? just chill ?

FriendlyHugs - February 9, 2016, 4:28 pm

All the people who actually have brains are salty because now there's going to be an influx of skids with botnets waving it around and we have to DDoS each of them to get them to shut up.

Wasting our botnet time.

KIDDING ?

Hes just helping people out let him be :)

pashabiceps - February 10, 2016, 4:33 am

He is helping skids "hack" innocent people. Is this something to be proud of?

It would be better if he actually learned something about computer security.

did i ever say "hack" obviously ddosing is not hacking, and no, my intentions are not to make the world a better place, don't think anyone on this forum is(well maybe some), but if you are i respect that but please no need to be salty.

What's wrong with you? I've been messing with RATs for a few years and I now feel like I'm ready to move to Botnets...

You must be ignoring your suggested daily allowance of Salt...
