Thread: [Need bug abusers / bug finders for RSPS. Read.](#)

Gørilla - February 9, 2016, 12:13 pm

Im currently looking for people that know common dupes and bugs which can tell me and allow me to fix them before release. I will NOT be taking members i find untrusted and I will only take people who have a decent trust level.

You will agree through PM to not release any of the files given, any information about the server, or anything like that. You agree that if you break those rules you will be black listed from me and the server.

Send pms or commnets and ill find people i find worthy;).

This.

I can help out as well. I worked with The Plague Doctor back in 2007 to 2010. I know him personally.
