Thread: [\[SOLVED\] Shoutbox is gone with the new theme](#)

.Bux - February 11, 2016, 5:18 am

Hey party people

I've tried (and succed) at changing the theme of my forum MyBB

The theme I installed is called "Reality Forums"

Here is the xml file: <https://puu.sh/n3VoF/d0f52736ee.xml>

It looks pretty good!

Spoiler [\(Click to View\)](#)

But the shoutbox/chatbox is gone now, and I'm not very experienced with MyBB

Is there a way to put it back?

Cordially!

Netflix and Weed - February 11, 2016, 5:51 am

Go to your plugins where you install theme and deactivate and reactivate it again. Mybb has always had that weird glitch. If you need any further assistance let me know, I have been working with Mybb closely over the years.

I've added it again but..

Spoiler [\(Click to View\)](#)

Looks like the current theme is fucking with the old shoutbox
Or maybe the opposite

Thank you for your help!

Thank you for your help!

Delete it completely and readd it via FTP.

It's hosted directly on a VPS, no need FTP!

I've tried with another ShoutBox (dvz) and it worked out

Thank you for your help!
