Thread: [Event viewer error](#)

5chn4pp - February 11, 2016, 8:38 am

Recently i had to take care of some rootkits/bootkits and i think my system is fully restored, the problem i am having is that certain programs dont work.

I looked in event viewer and saw these:Code Activation context generation failed for "C:\Program Files (x86)\Notepad++\NppShell_06.dll". Dependent Assembly Microsoft.VC90.CRT,processorArchitecture="amd64",publicKeyToken="1fc8b3b9a1e18e3b",type="win32",version="9.0.21022.8" could not be found. Please use sxstrace.exe for detailed diagnosis.

This happens with other programs, does anyone know what this is? I tried google and installed some c++ packages but that did not work.

archangel.dmitry - February 11, 2016, 8:44 am

Have you tried reinstalling corresponding VC++ component?

5chn4pp - February 11, 2016, 2:50 pm

VC++ 2005, 2008, 2010 and 2013 are all installed.

archangel.dmitry - February 11, 2016, 3:08 pm

But, did you try reinstalling it?

5chn4pp - February 11, 2016, 3:54 pm

Just tried that, did not work.

archangel.dmitry - February 11, 2016, 5:59 pm

Could you be a little more specific about "restore" that you have done?

PrinceJunkie - February 12, 2016, 5:45 am

Open up cmd and try the command "sfc /scannow"

5chn4pp - February 12, 2016, 6:28 am

a dism command fixed it, thanks for all the help.
