Thread: [Juice Jacking\(help please\)](#)

Requiem_knight - February 11, 2016, 10:29 pm

I'm looking for a viable and reliable method for juice jacking a IOS or android device, preferably IOS. Any mactan I could buy or plans for making one? I would rather just find a source that I could buy one that would be able to copy SD contents with no real need to upload malicious data.

Any help would be greatly appreciated!

Lmfao - Someone has watched too much CSI: Cyber

Its the art of stealing data from phones using malicious charging points if i remember correctly, super easy to script in python
