Hello guys! I'm back :D

So how have you all been doing?

I've been working with capturing pedophiles ip for a while and noticed that they are using packets from HF so can you all make me a favor and dont load up any "free just click download" packets?

It would help the world alot :)

As an old mentor in ewhoring, i know this will cause some troubles but i think it will be better in the future.

Happy ewhoring

how ironic, you are on hack forums, trying to catch pedos, but they are using things FROM hack forums.

?

Pedophiles? There are 100,000s they wont stop. Used to try it on omegle met the same guy 5 times in a row, gave up.

unless something irl happens thats when they will stop.
