You are selling a a method that is "private" for 5\$? How are you expecting it to stay private?

You should make it cost more if you want it private :P

Well, it can't be saturated, so even if it does get leaked, it wouldn't be a problem

And your just an asshole if you leak things, but to each there own
edit: What should i raise the price to then?

I am not saying that I leak anything :O

I dont know. if it really cant get saturated then 5\$ is a really really really good price.
Can i grab that vouch copy?
