?This person has been harassing me and some friends he has somehow gotten into some of our social media accounts. I just want to locate the person and/or do damage to the mother fucker. How do you locate an Ip address with an IPv6 address it does not work. If anyone can help me and/or hurt this person would be much appreciated. I need to know who this person is. Also any advise to hurt the person like gain his info and exploit it would be much appreciated.(already did the IP logging sites thing he didn't fall for it ?

Not sure how to read that ip address.. but if you find a way somehow hahah you could hit them offline for a couple days if you were to consider investing in your own servers.
