Thread: [\[Official\] Enigma Recruitment || Looking for Programmers](#)

Comple? - February 14, 2016, 1:44 pm

Welcome to Enigma's second official recruitment. We stand as a unification of knowledge, cooperation, development, and utilization of all aspects in regards to technology, and technological advancement.

Rules & Expectations:

1. No leaking from our sub-forum.
2. No scam reports.
3. Stay active and participate.
4. Keep drama to a minimum.
5. Scam reports < 6 months where you have been found guilty will result in denial.

Refer to our previous [thread](#)

Application:

This recruitment is for my specialists. I am looking for a very select group of individuals (5-10) that will work with me for specific forum releases in the upcoming future. Any pure text-based applications will be denied. Applicants must present their application in correlation with their skills that they will bring to the group and myself (programming, design, etc.). You must be able to contribute something whether it be a skill or a resource (you may text based PM me for resources). Be creative, this isn't as hard as you think.

Black Kodak - February 14, 2016, 1:49 pm

reserving this spot for not my app

Comple? - February 14, 2016, 1:53 pm

You can reserve a spot if you really want to. I will be reviewing all posts anyways. Looking for any type of skills also ?

??? ??? - February 14, 2016, 1:55 pm

I am a professional nose picker by trade, I can share my skills with this talented group.

NGMA - February 14, 2016, 1:55 pm

Seems like an interesting group, best of luck with the recruitment! I'm still waiting to find a group I

really connect to before applying.

Granny Bacon - February 14, 2016, 1:56 pm

Reserving this spot for my app.

Varane - February 14, 2016, 1:57 pm

I am currently good with advertising and marketing another skill factor of mine is NFA. Cracking and selling NFA accounts.

No special application, i am just gonna be straight forward.

I can bring my skills, knowledge and 4 year experience to this group.

That is all.

Can - February 14, 2016, 1:57 pm

Reserving this spot for my app.

Chubs™ aka badman - February 14, 2016, 1:58 pm

I have a few tricks up my sleeve with social media. I can grow/run them pretty good and grow them fast. Let me know :)

WOLGA - February 14, 2016, 2:06 pm

What do you expect of Enigma?

To have a goal and not just be another lounge group.

Specific Skills?Java

C++

C

Batch scripting

Creative problem solving

Cryptography

Chess

Why should we pick you?

I'm a good team player, leader, and have the above skills.

Anything Else?

If I'm denied, please let me know why.

?Dark Psychosis - February 14, 2016, 2:07 pm

My Skills

1. Python
2. HTML
3. Some PHP
4. Learning Java Again
5. Working with forums software, hosting, etc.
6. Hardware Diagnostics
7. Networking

- 8. Server Management
- 9. Money Management

A little about myself

I am a very driven individual who loves to teach what I know and learn what I don't. I am currently running a hosting company and as well am working as a IT part time. Some of my hobbies include web development, managing servers for others, and as well repairing and building PC's. I am also currently practicing virus removal as that is something I definitely want to get into.

EDIT: Fixing so its non text based

Comple? - February 14, 2016, 2:07 pm

Think of a non text based application that you can make based off those skills. Lots of things should come to mind.

WOLGA - February 14, 2016, 2:17 pm

(Feb 14, 2016 03:07 PM)Comple? Wrote: [\[CITE\]](#) Think of a non text based application that you can make based off those skills. Lots of things should come to mind.

I am unsure of the criteria you are looking for. Perhaps you can better evaluate me by giving me a minor project, instead of requiring me to make arbitrary judgments of what I should do.

Comple? - February 14, 2016, 2:25 pm

(Feb 14, 2016 03:17 PM)Qwertyuiopasdfghjklzxc Wrote: [\[CITE\]](#) I am unsure of the criteria you are looking for. Perhaps you can better evaluate me by giving me a minor project, instead of requiring me to make arbitrary judgments of what I should do.

I don't have a set application preference that I'm looking for. You have skills in many different areas, how can you apply those skills to make me a non text based application. This is part of picking who I will be adding.

+Haze - February 14, 2016, 2:29 pm

"Any pure text-based applications will be denied."

Why? If you're a programmer for example, you should be judged based upon your previous work and code quality. By saying, "Any pure text-based applications will be denied." it seems like you're looking for designers more than anything else.

WOLGA - February 14, 2016, 2:29 pm

Does Enigma have a goal, or is it just a lounge group with a slight focus on programming?

?Cyber - February 14, 2016, 2:47 pm

We'll be opening a recruitment for developers and designers later today.

WOLGA - February 14, 2016, 2:51 pm

(Feb 14, 2016 03:47 PM)?Cyber Wrote: [\[CITE\]](#) We'll be opening a recruitment for developers and designers later today.

If that's the case, then what was this recruitment supposed to be for?

GreyHatZone - February 14, 2016, 2:52 pm

Name: Farouski

What are you looking for from Enigma?

I am looking for a group to call my family, a place where I can help others and get helped not looking for any lounge drama at all.

Some major skills I have!

Gaining info quickly on extremely useful programs.

Ewhoring

RATing

Wifi Hacking more specifically (Packet Sniffing)

I am also attempting to build a YouTube channel that will be quite useful for hack-forums users it's niche is hacking, more specifically on hackforums products and tools.

Comple? - February 14, 2016, 3:37 pm

(Feb 14, 2016 03:51 PM)Qwertyuiopasdfghjklzxc Wrote: [\[CITE\]](#) If that's the case, then what was this recruitment supposed to be for?

My own personal group of people within the group. Different focus and group projects etc.

(Feb 14, 2016 03:29 PM)+Haze Wrote: [\[CITE\]](#) "Any pure text-based applications will be denied."

Comple? - February 14, 2016, 3:56 pm

(Feb 14, 2016 04:42 PM)Qwertyuiopasdfghjklzxc Wrote: [\[CITE\]](#) What is your goal?

Nothing that I'm posting publically for now. For now, forum releases and overall contribution to the group. Also for all applicants, don't try to claim a skill that you don't actually have, I can test you in nearly anything. For example programming, I can test you. If you claim something like "I know how to packet sniff and steal info" then I will setup a practice and see if you pass. So please don't claim anything outrageous (like knowing 15 different languages or saying that you're some sql god) unless you can back that up in the application or to me. Other ideas, lets say your app is for pentesting or web vulns, let's see a defaced page with your application on it, etc. Be creative, last time I'm giving ideas.

Male - February 14, 2016, 10:35 pm

reserving this spot for my app

Vellichor - February 15, 2016, 5:22 am

How does this group contribute to those that can contribute?

weapon - February 15, 2016, 5:27 am

I am posting to apply for the membership of this Group.

What can i contribute?

I can code programs in vb.net.

The program which i coded in past:

1. <https://hackforums.net/showthread.php?tid=3647566>

Hope, i will get accepted in this awesome group.

Thanks,
weapon

Kioshima - February 18, 2016, 10:09 am

Confused between the two recruitments, but ok!

BobDarling - February 18, 2016, 10:09 am

Hello Enigma team !

What do you expect of Enigma?

Some group to hangout with, as well as a few project buddy that can challenge me and that i can challenge. I'm tired of working alone. I don't need a "corporate evaluation" once a year focusing on bullsh*t administratives things and about my clothes/barb/shoes not matching company director's socks color, i need to work with and confront others talented IT guys ! That's what you could give to me.

Specific Skills? Software engineer => can code in nearly anything pretty quickly, and know the foundations of what i'm working with.

-----> Specialities : JS (full stack); PHP (not practising but pretty well skilled because that's the first thing i learned, as a kid), C# (not my tea cup; but hey, uni given me that skill); Web in general; a bit of java, etc.

Sys admin => can put in place nearly any online solution/server/cluster; can maintain mysql and sql server well; etc.

-----> Specialities : You know what ? I have got two jobs where I have done a lot of sysadmin (cloud specification and installation, openvpn automatisation, git auth management, hidden services pool, etc.). But what i'm proud of is not about these two company. It is being able to f*ck over networks via diverse methods (I am not talking about basic dos/ddos, but some refined methods to get down networks).

-----> I'm not a coder nor a sysadmin ! I'm a software engineer ! That's mean a lot more. I can manage a team, i can do a hella number of corporate IT documents (spec, review, security analysis, poc, etc.), and above all, I am an Architect/Lead dev/whatever you call it. That mean my work focus on giving visibility (technical, organisational, etc.) to a team.

Why should we pick you? I am passionated about what I do.

I am "playing" on "warez" boards since like 10 years (scanning ftp and getting point for getting links was what i was doing).

I need to learn new things nearly whole time or i get depressed.

Don't ask me why i put this over there; i feel like it could be useful : I worked with and maintained a few WoW server in the past (the 2 or 3 first extensions) (peak at 300+ players on saturday night).

I have got a gold badge on stack overflow (this one is maybe pretty lame :D) =>

<http://stackoverflow.com/help/badges/28/famous-question?userid=1719440>

Anything Else? I am a diplomed software engineer/sysadmin, proactive in a LOT of IT domains (just ask anything.. My weaknesses are mathematics & design.).

I have got an online portfolio listing a lot more of skills that i'd prefer to keep private since there is my real name/photos on it. I'll give it to the admission judge if necessary.

I have gotten up a "Tor & Proxy" library that i use in this software i released =>

<https://hackforums.net/showthread.php?tid=4133307>

 http://s28.postimg.org/4cc5rzfa1/torrent_Swarm.jpg

I have got another app (private) based on the same library, doing some automated and modular botting on any webpages. I can send it to the enigma team as well as the TorrentFaker for private review. Here a screenshot =>

 <http://s24.postimg.org/n0rg0z30h/proof2.jpg>

I am currently working on getting new skills in electronics. I have two proof of concept (and a few lite electricity finger burns) sitting on my desk that I wish to develop more.

I roll weeds pretty well

Hope i'd be read !

Cheer

Will come back later

regexks_ - March 10, 2016, 5:38 pm

I'm a network architect by trade and a demolisher by choice. Yes, 99% of the SST forum is borderline mentally handicapped but there is that 1%. Feel the Bern.

I'm pretty well-known for being that guy you come to when there's something you can't fix.

I know quite a bit of C and PHP with some experience in Perl and Python. I really enjoy working with CGI languages as I do a lot of back-end web development and API work.

I have too much experience working in Unix and Linux production environments, specifically Debian, Red Hat and Arch-based distributions. I'm actually very good at shell scripting. Seriously. I

can pump out one liners for most Unix-based systems off the top of my head that make even the most difficult tasks a really funny joke.

Some interesting things I've made or posted

[Scanning For All Spoofed UDP Reflection Vectors With Custom Payloads](#)

Led to a significant jump in volumetric DDoS attacks. Once you can enumerate the internet and probe it for everything and anything it becomes very easy to min/max attacks. I'll probably be setting up the UDP honeypot again, I was getting more than just DDoS scan attempts :^)

[Official ddosDev UDP Amp Lists | #1 On HF | Highest Amplification Rates | All Methods](#)

Perhaps one of the most well-known services that has existed in SST. I think I can be considered a pioneer of reflected DDoS.

[Backend Resolving Service | Reveal True Backend IP Addresses | Works On ANY Website](#)

Another well-known service that still gets me private messages today! Yes, it does work 99% of the time.

[Testing Non-Distribute File Scanners](#)

I don't RAT but why not show some love? I got some interesting results from this project.

[VirtuLayer | Bulletproof KVM VPS | Spoof | Malware | Botnets | Host Almost Anything](#)

This was a fun project that really taught me how to both run a hosting company, manage a network of a handful of very expensive dedicated servers and deal with a terrible consumer base. KVM is also one of the best virtualization solutions I've had the pleasure of using with Xen coming in a close second.

[How To Steal Amp Lists From Popular Stressers](#)

Another fun one. This stirred some shit :)

If you need more information contact me via PM or XMPP: regexks_@lsd-25.ru

Another well-known service that still gets me private messages today! Yes, it does work 99% of the time.

[Testing Non-Distribute File Scanners](#)

I don't RAT but why not show some love? I got some interesting results from this project.

[VirtuLayer | Bulletproof KVM VPS | Spoof | Malware | Botnets | Host Almost Anything](#)

This was a fun project that really taught me how to both run a hosting company, manage a network of a handful of very expensive dedicated servers and deal with a terrible consumer base. KVM is also one of the best virtualization solutions I've had the pleasure of using with Xen coming in a close second.

[How To Steal Amp Lists From Popular Stressers](#)

Another fun one. This stirred some shit :)

If you need more information contact me via PM or XMPP: regexks_@lsd-25.ru
You will never be apart of Enigma. We look for bright, quality members. Sadly, you have none of the traits that we would want and all of the traits that we wouldn't.

I don't run a website not do I have one. So what are you referring to?

Romantic - March 10, 2016, 9:51 pm

Glad to see some new recruitment for Enigma!

Comple? - March 10, 2016, 11:05 pm

(Mar 10, 2016 10:54 PM)regexks_ Wrote: [\[CITE\]](#) I just bought your Project: Enigma thing via Bitcoin.

I expect rapid delivery of my warez!

"We reserve the right to revoke your service at any time without compensation."

Revoked due to security concerns. Thanks. This thread is for recruitment, so lets keep it on topic.

ng-Coder - March 10, 2016, 11:05 pm

I don't even know how to apply for this but I'm curious about which projects you guys are up to in your group. Accept me ?

regexks_ - March 10, 2016, 11:06 pm

We all know why you purchased my product and it wasn't because you were interested. Go ahead and make a scam report. All these posts are reported also, this thread is for recruitment, not for you to bitch.

I purchased your product to use it as intended and prove a point.

You purchased my product in order to smear it. You're not receiving a refund.

(Mar 11, 2016 12:12 AM)regexks_ Wrote: [\[CITE\]](#) Rofl, poor friend. Keep my money, you'll need it to pay for your \$3000 CPU's ?

I don't need your money. All my servers are through a personal business contact that I have. I run a transit and colocation business already so this venture is nothing complicated and I'm making sure that I don't turn a single profit by offering my service at a low and affordable rate.

regexks_ - March 10, 2016, 11:18 pm

I'm not. Sorry that you're wrong. Now stop spam posting my recruitment thread, all it will lead to is a ban.

ILY ? - March 11, 2016, 6:46 am

What do you expect of Enigma?

A group with professional OPs with different skills who would work together on awesome successful projects.

Specific Skills? Social Media Marketing- Very Good
