Hey guys, theres there really awesome app called "Someline Apple Tree". Basically you let your phone sit while apples grow. Then you collect the apples, and redeem them for paypal cash.

When you sign up click "Fruits" and then click the QR scanner in the upper right hand corner. Scan this code.

Now to make this work, we need to do this thing by joining a group. If we join a group, EVERYBODY grows apples faster. Meaning the more people who join the group, the more money we ALL make.

To join, simply go to "Grow" then click "Groups" then go the top right and click the search icon.

Enter our group ID which is "13837"

If we all do this, we ALL can be banking in some serious money!
