@OP; this is extremely amazing - I really love the font style and the background image.

Looks very good.

Only thing I'd say is increase the quality of the pic, the background and text are bit blurred.

Try re-making/re-sizing your pic to a higher resolution. then you can make it smaller once your done making the higher resolution one :))

Yeah, the parrot looks kind of 'fake'.

It'd be awesome if it blended in with the text - the same brightness.

I really like it. the only thing is the X and the V at the end... I would make the shadow less transparent (more opaque) so it looks more like a 3d effect than a shadow. Also those two letters are a bit too clean. Maybe scratch them up a little like the other letters. (ie. the E)
